

Science classes are becoming more and more diverse and Fish and Fisheries Worldwide will complete our current collection. Used both for research and fact finding, this database provides more than 539,685+ citations and abstracts on all aspects of aquiculture from 1971 and earlier to current breaking information. Everything can be related to fisheries....from antelope to zebras.

## DATABASE HIGHLIGHTS

- Integrated with Library Website
- Easy to navigate
- Search terms in results
- Excellent science project research tool
- Updated 4 times a year
- Use with any browser
- Topics include:
  - culture and propagation
  - limnology
  - oceanography
  - genetics
  - behavior
  - natural history,
  - habitat management
  - fish processing/  
marketing,
  - general research
- Each year more than 30,000 records are added with coverage of research, history, current issues
- FFW includes thousands of journal articles, books, monographs, pamphlets, conference proceedings, symposia, government reports, theses, dissertations, and scientific periodicals
- Extensive keyword indexing permits very flexible subject searching
- Taxonomic and geographic identifiers
- Available though BiblioLine in an online interface
