

Homework #11 (Due Wednesday, April 10)

1. Test #5 will take place on Thursday, April 11, covering Chapter 5.

- Make sure to bring a **scientific calculator**, properly configured, that would be needed for doing problems in Assignments #10 and #11. It is your responsibility to make sure you learn how to operate the calculator, testing it against the given answers for odd-numbered problems in the assignments, before coming to take the test.
- The test will be **open book, open notes**. But the Student Solution Manual will not be allowed. Again, you are prohibited from exchanging notes during the test.

2. As the class agreed, this homework set will be due the day before the test. You will be given complete solutions on Wednesday when you turn in the homework. Please make a photocopy of your work before turning it in on Wednesday, as you will not be getting the graded work back before the test. You will be allotted ample time during our meetings on Monday and Tuesday to work on these problems in class.

3. Next week we plan to enter Chapter 7 (skipping Chapter 6), followed by Chapter 8 and parts of Chapter 9 in subsequent weeks.

Section 5.3:

9, 11, 13,
14, 15,
17, 19, 21,
23, 24, 27,
29, 31,
37(a)(b)(c)[skip (d)], 39.
