Special Free Affiliate Report

## Why am I giving it for free?

When I was at the age of 13 years old. The internet was full of advertisements selling hope to people.

Selling e-books valued ranging from US\$99 - US\$499. To be honest, I did invest in them only to find out that the information are all the same only being re-packaged different, supposedly by different authors.

With most authors promising a step by step guidance and mentoring, I received none. Probably, some of them really do but most of them are making this industry look bad.

Everyday as I surfed the internet, reading all the spam emails, all I see is more people copying, duplicating this marketing system. Offering people

hope with re-packaged product.

Why am I giving this report for free? Because I feel it should be free! Free for the people out there to know about it! Free for the people out there to try and give themselves a chance! Free for those who really want to know about this business. It is not fair for them to pay a hefty sum of cash just to know it.

This free report contains some basic information for those who wants to try it out without any guidance or mentoring. The information which I have invested a lot to obtain, only to find out it is just a basic information that an affiliate should know for free which is readily out there for FREE!

Cheap marketers out there using words promising of hard earn cash with products that are honestly, being over-valued.

Here, now, today. I am realizing this free report, totally free for those who wants some basic information on how to start or to be an affiliate online.

Enjoy the free report! A lot of the so-called "Gurus" won't be happy about this.

Everything that I am about to share is free and you do not have to pay anything.

### Free Affiliate Report

- How to start?
- Where to start?
- Is it easy?
- How much can I earn?

## What is an affiliate?

In Internet marketing, an affiliate is a person or company which sends visitors to a website in exchange for commissions.

Affiliates can earn commissions in three ways: per click, per sale and per lead.

Pay-per-click programs have declined dramatically in numbers because of fraud.

Pay-per-sale and pay-per-lead programs are still very common.

These days, affiliate merchants or vendors the whole process easy for affiliates. You go to the vendor's site, type in your name and address, and wait for your website to be approved. In some cases, approval is automatic.

## What is an affiliate? (Continued)

Each affiliate is given a unique link to paste into his or her website, so the vendor can track which affiliate is responsible for generating a sale.

Most affiliates own a website or several websites. However, some earn commissions by paying for advertising and sending the visitors directly from the ads to the merchant.

## Secrets of an affiliate revealed!

As mentioned, most of the products out there are valued at US\$99 - US\$499, where actually, you can obtain it for free. So how does an online affiliate start?

There are so many avenues for an online affiliate or marketer to start with. I will list them in this report. Starting with where to open an account, ideas to market for the

*"Affiliates who just want to do it part-time to supplement their income to serious ones that wants to go all out to make a bang on becoming an online affiliate."*

basic affiliates up to the more serious ones.

Affiliates who just want to do it part-time to supplement their income to serious ones that wants to go all out to make a bang on becoming an online affiliate.

I will list down different websites on where to start your affiliate business, programs which pays you to read emails that does not

requires you to pay anything and online marketing ideas.

Before we go further, there is something that these "Gurus" did not mentioned. It is not easy and requires a lot of hard work at the beginning.

Then after, if you do it well, the rest is easy.

## Secret #1 (Selling other people's product)

To be an affiliate, you must have something to sell. There are websites that will require you to sign up with them and start selling. If we were to do this for every single website out there, you are going to do a lot of typing and lesser time to think whether their product is sellable. A market place where you can browse through tones of other people's product, with ready pitching page. All you have to do is

market their product and collect your commission when a sale goes through. This place is called Click Bank, use this link

> <http://beam.to/click-bank>

At Click Bank, all you have to do is open an account. Put your real name. This is important because when your commission check is

ready to be issued to you, it will be issued under the name that you have registered. Keep all your details as accurate as possible to avoid inconveniences.

Once you have open an account, browse the market place and you will be surprised on the number of products that are waiting -

## Secret #1 (continued...)

to be sold. This is where your journey to be an online affiliate or marketer begins. Browse through the market place and see which product you are comfortable on selling.

How to sell it? It is very simple, Click Bank themselves has a tutorial on how to do it. Once you have selected on the product you wish to sell as an affiliate, Click Bank will create a tracker link for you to refer buyers to. Once a buyer buys that particular product from your tracker link, the commission is yours. How much you will actually earn depends on the publisher which you will know. The details are transparent.

Although a tracker link created by Click Bank for you is unique, it is easy for another affiliate to take notice or a

tracker link. Most of the cases in the online market place, another affiliate will replace your tracker link with their own and they will receive the commission when they purchase it, instead of you. Day light robbery right?

So here is the think, we as online affiliate will use a thing we called a redirect link where your tracker link will be hidden behind it and no one can change your tracker link and steal your rightful commission.

Now, where can you get it? I have two

services in hand but I personally only like one of them but it is up to you to choose.

Read on under "SECRET #2" below.

## Secret #2 (how to hide your tracker link)

As mentioned under "SECRET #1", other affiliates will change your tracker link to their own and steal your commission.

One way to counter attack this is to use URL Redirect and hide your tracker link from visual sight.

There are two ways of doing this, one way which is an expensive way, is to

"One way to counter attack this is to use URL Redirect and hide your tracker link from visual sight."

have your own website and do a "HTML" re-direct coding.

The other way which is a free one is what I am going to share with you.

There are two free URL re-redirect services online, they are <http://pinurl.com> and <http://beam.to>

These are the two free URL-redirect services online but I only like one of them but you have the freedom to choose. It is your pref-

erence and it is your own affiliate business.

To use these services are easy, go on their website, sign up and open your account and start to create URL re-redirect links to your tracker link.

It is that simple and free!

## Secret #3 (where to display your affiliate links)

Ok, now you know where to find things to sell and how to hide your tracker link. What is next in line for you?

If you have guess it correctly, yes, a place for you to display your tracker link.

Some people create their own websites and put their tracker links into their website. But this is going to cost you money but I am not saying it is not

a good way of marketing but an idea I am sharing with in this report is via Blog. Having a blog is free but you have to have your very own idea on what your blog is about.

There are so many blog providers but the one I recommend will be <http://www.blogger.com>

Why am I recommending this particular blog to you? For one simple reason, this blog provider is owned by Google and hence, it will be easier and faster for your blog to appear on Google search engine if there happens to be people searching for things related to your blog.

## Secret #3 (continued...)

Starting your own blog site is easier than it seems. With Google now having enhanced their blog services, there are so many ready templates to start with.

The only thing that you have to do is to have your own original idea on what your blog will be about.

For some of the people, they go on with a personal blog, writing everything that has happened in their daily lives including the places they went to, the restaurant they dine in, the things they bought. They blog on their personal life.

Others can go on blogging on their interest. For example, a person really likes to cars, he scouts the internet, grabbing pictures and putting his own critics on a particular car.

While some blog on books. What is the latest book? Where is the best place to get books?

There are so many things you can blog on and use this opportunity to turn your blog into an income making machine.

All you need to put in is effort. Nobody said starting out is easy but it will get easy once you are up and running.

## Secret #4 (How to fully utilize your blog)

Right! Now you are all set with your own blog with your affiliate tracker links in it.

What else are there in line?

Yes, you have to fully utilize your blog and the key word is advertising!

Tapped on the advertising revenue.

When people click on the ad-

vertisement that is advertised on your blog or website, you shall earn a commission of it. It is that simple.

No selling just advertising and earn when people click on it.

The common mistake that online affiliates do when they get greedy is that they click the advertisement themselves and this is the fastest way to lose your advertis-

ing account and will never get it back.

So refrain yourselves from click advertisements on your own blog or website.

Open your free advertising account free here > <http://beam.to/bidads>

When you are there, open an account as a publisher because you are publishing advertisements on your blog or website.

Just follow their ready and friendly steps.

"So refrain yourselves from click advertisements on your own blog or website."

## Secret #5 (Get paid reading emails)

Now, you have fully set-up your income making blog site.

What else are there to earn your income online? To be honest, there are endless ideas online, you just have to surf and acquire it.

Then again, I will share with you just one more thing. I have seen many advertisements asking people to pay a certain sum of money to join their group to get paid for reading emails.

You know what, 90% of them are scams. Once they have collected enough money, they will disappear.

Nonetheless, I have one reliable source which you do not have to pay a single dime to

join but all the money you can earn by reading emails they sent. I am serious about it, the only catch is that, to earn more, you just have to refer more people to join. It is not that hard since you do not have to pay anything ever to join.
