**How to use the San Francisco Bike Map & Walking Guide**  
This map and guide is designed to help you choose biking, walking, and even running routes to get around in San Francisco on the least hilly terrain.  
Numbered routes shown on the map are the Official San Francisco Bike Routes, and generally avoid steep hills and heavy traffic. Bike path, bike lane, and shared roadway designations (see legend) are designed to help you choose a route appropriate to your skill, familiarity with the City, and destination.  
Non-numbered routes (paths, lanes and shared roadway/wide curb lanes) are popular alternatives to the Official Routes. Always use caution when bicycling anywhere in San Francisco.

### Understanding the Official San Francisco Bike Route System

- Numbered bike routes are part of the Official San Francisco City Bike Route System
- Even numbers indicate east-west routes
- Odd numbers indicate north-south routes
- 3-digit numbers indicate connector routes
- Street signs with a green bridge icon indicate cross-town routes
- Look for detour signs for alternate routes during construction.
