## PHEROMONES REVIEW

### *Do you Dream of Attracting Beautiful Women?*

*Would you like to have an 'unfair advantage' in pursuing gorgeous women?*

*With Exclusive University Tested and proven Di-Dehydroepiandrosterone, Pherlure Pheromone Cologne is the **STRONGEST** Aphrodisiac available ANYWHERE.*

**Guaranteed Results: All Orders come Risk Free with our 30 Day Money Back Guarantee**

Pheromones are natural chemical scents the body produces in order to communicate with others nearby. They are well documented in the animal kingdom as the force that controls all social behavior, including mating. It has now been recently found that human behavior is also heavily influenced by these airborne chemicals. They will help you **attract sexual attention instantly from the opposite sex!**

Women don't base their choices of men on how "nice" a guy is or even how good looking... They choose the men they do because they feel a powerful **GUT LEVEL ATTRACTION**... And guess what? **YOU CAN MAKE ANY Woman FEEL that Powerful ATTRACTION!** Women have their "Attraction Mechanisms" triggered by things other than looks. Pheromones are a chemical sex signal that humans secrete to attract the opposite sex. Nature's chemical sex signal to attract the opposite sex. Pheromones will arouse the female sex glands, heighten sensual responses and awaken her appetite for sex. **We 100% guarantee Pherlure supplemental pheromones will enrich your social life or your money back.**

### Recent Media Coverage On Pheromones Seen On:

### AskMen Product Review:

*"If you've tried just about everything to get the ladies and yet nothing has worked, here's something that will boost your confidence and have the women floating over to you" ... "This is for the guys out there who need that little boost of confidence to get with women. You have it in you already, but perhaps **Pherlure will help you get the women to notice you.**"*

Sexual Health Advisor

# How Pherlure™ Works

Since 1703, scientists have known about an organ in the nasal cavity known as the vomeronasal organ or VNO. They assumed it was an evolutionary relic - an organ that humans no longer used. However, in the last 25 years, scientists have discovered that the VNO is the receptor for pheromones. **The VNO gives us a sort of "sixth sense;" we can't see, smell, hear, or feel pheromones. As a matter of fact, we cannot consciously perceive pheromones at all, though experiments prove that they can work.**

Now it has been proven conclusively, **humans produce and react to pheromones**, so much so that studies have even shown that exposure to men's pheromones can affect a woman's ovulation cycle, meaning, **her readiness and interest in having intercourse**. For example, it has been discovered that when the underarm sweat of women in different menstrual phases is placed under the noses of female subjects, the length of these subjects' own cycles is significantly altered. Underarm sweat has been shown to have a pheromone component - dehydroepiandrosterone. This explains why females living in close quarters, such as college dormitories, often have synchronized cycles.

Men and women exposed to pheromones claimed that they felt self-confident, attractive, and romantic. In tests of pheromone effectiveness, it has been found that **74% of subjects testing a pheromone product experienced an "increase in hugging, kissing, and sexual intercourse."** Also interesting, foods that have been known for centuries to have aphrodisiac qualities, such as truffles and oysters, have recently been found to chemically correspond to human pheromones. Still not convinced?

A [recent study](#) conducted at The University of Illinois - Chicago reports that the "Novel human pheromone formulation (Di-Dehydroepiandrosterone) **increases sexual attractiveness.**"

The study shows, "The plasma pheromone levels increased in the Di-Dehydroepiandrosterone group by 22.6%" Eighty-four men participated in this study testing the chemical.

Forty-three used Pherlure (Di-Dehydroepiandrosterone), and forty-one used a placebo fragrance.

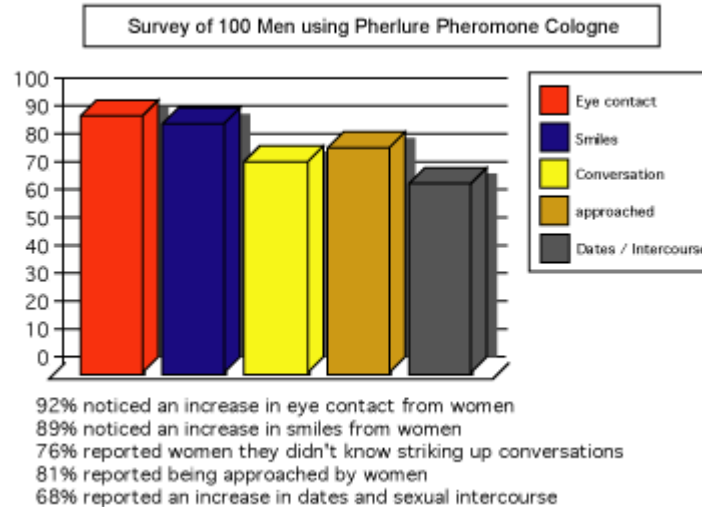

The men were asked to document all sexual activities for the duration of the 12-week experiment.

Results indicated that **Pherlure users "sexual intercourse activity levels increased by 62.4%"** while the forty-one placebo controls increased by only 2.8%, respectively.

Based on these results, the researchers concluded that, "**Pherlure** caused a statistically significant and distinct increase in those romantic behaviors in which a woman plays a major role. Thus, Di-Dehydroepiandrosterone does affect the sexual attractiveness of men to women."

ABC News conducted an experiment of their own to see if pheromones really do work. They took a set of identical twins and applied a pheromone oil to one twin and plain, old witch hazel to the other one. They took the twins to a bar and had them switch places throughout the night so no one would realize they were 2 different people. **The results were amazing! 30 men approached the twin wearing the pheromones while only 11 men approached the sister wearing witch hazel. The use of pheromones appears to have tripled the success rate!**

### Changing the way you interact with the opposite sex.

**The power of pheromones are well documented...**

- [Sex Appeal in a Bottle? - IHealthJournal](#)
- [Pheromones: Participants in your Sex Life -CNN](#)
- [Signs of Elusive Pheromones in Humans -NY Times](#)
- [Sniffing out Human Pheromones - Washington Post](#)

Without changing anything about your presentation, **the opposite sex will find you more sexually attractive.** Soon, you will notice more women making eye contact, flirting and talking with you. This will give you an *extra edge over the competition*

Scientists have long known that certain hormones, called pheromones, trigger **strong sexual desire** in animals. *This is the reason that male dogs are driven crazy by a female dog in heat.*

Humans too, are influenced in a similar way with the presence of pheromones. Unfortunately, due to evolution, our bodies do not produce enough pheromones *naturally* to stimulate a response in the opposite sex.

### Drive your partner **CRAZY** with the power of science!

Pherlure™ is worn much like a cologne; when applied to your clothing, neck and wrists, women will *subconsciously* detect the pheromones and will suddenly find you far more sexually attractive.

Pherlure™ is also the answer to having more and better sex with your wife or girlfriend. Pherlure™ will **stimulate an aphrodisiac effect** in your partner. She will

**The powerful effects of sex pheromones have been well substantiated. You may have seen stories about human pheromones on CNN, 20/20, Dateline NBC, Hard Copy, MTV, or many other television programs. Newspapers from coast to coast, medical journals, and many different magazines have featured stories about the amazing discovery of pheromones.**

***Excerpts from recent media coverage:***

**Sex Product Review - Pherlure Pheromones:** Feb. 11, (AskMen) — "This is for the guys out there who need that little boost of confidence to get with women. You have it in you already, but perhaps **Pherlure** will help you get the women to notice you..." [Click to read the full article.](#)

**Product of the Month - Pherlure:** July. 09, (Alpha Male Magazine) — "If you're looking for every sexual edge you can get, **Pherlure** might well be for you. It's subtle enough to remain undetected, but smells as good as any cologne you got. Carry a stick boys, these bottled pheromones are the real deal." [Click to read the full article.](#)

**Study Shows Human Pheromone Cologne Effective in Attracting Opposite Sex :** Nov. 17, (IHealthJournal) — "there is support in data for the claim that this new human pheromone formulation, Di-Dehydroepiandrosterone (marketed under the trade name "**Pherlure Cologne**") increases the attractiveness of the wearers to the opposite sex." [Click to read the full article.](#)

**Sex Appeal in a Bottle? :** Dec 19, (IHealthJournal) — "new human pheromone formulation (Di-Dehydroepiandrosterone) does indeed increase sex appeal in those that apply the substance. The pheromone formulation is being sold as a spiked fragrance under the name **Pherlure** and certainly brings the science of courtship to the 21st century." [Click to read the full article.](#)

**Questions and Answers about Attraction:** March 04, (Human Life Science) — "Recent University studies... further engage in more sexual activity with the opposite sex than the men in the control group. The pheromone blend Di-Dehydroepiandrosterone (patented under the name **Pherlure**) is particularly the one that has shown to have the greatest significance in studies to date. " [Click to read the full article.](#)

**Animals use Pheromones to Communicate, but do Humans?:** Aug 28, (WebMD) — "Some couples just seem to have a certain chemistry together. Research is showing that they might be exactly right." [Click to read the full article.](#)

**Love Is All in Your Head -- Or Is It in Your Genes?:** Feb 14, (WebMD) — "In humans, the effect is quite different, because they have to inhale their own pheromone for it to work," Peter Pugliese, MD, PhD, tells WebMD. From the nose, the pheromone travels to a part of the brain involved in emotions and sex drive.." [Click to read the full article.](#)

**Secrets of human attraction:** - Aug. 29, (BBC) — "A gene that could explain how humans pick up powerful chemical signals called pheromones may have been

pinpointed for the first time." [Click to read the full article.](#)

**Sniffing out Human Pheromones:** - March 12, (The Washington Post) — "There was ample evidence that human pheromones exist; babies show a clear preference for pieces of clothing that have been worn by their own mothers, for example, and research suggests that men and women choose their mates in part by sniffing out partners with compatible immune systems." [Click to read the full article.](#)

**Human Pheromone Link May Have Been Found:** - Sep. 28, (NY Times) — "Scientists have identified the first human gene that may be linked to pheromones, the odorless molecules that in other animals trigger primal urges including sex, defense and ..." [Click to read the full article.](#)

**Sex Organ Up Your Nose:** July 9, (ABC Australia) — "But now we are beginning to prove that we humans can influence each other with our smells - and, that we pick up these smells with a strange sex organ inside our noses!" [Click to read the full article.](#)

**Sexual Orientation: In The Brain:** May 9, (CBS News) — "It turns out that sniffing a chemical from testosterone, the male sex hormone, causes a response in the sexual area...These chemicals are thought to be pheromones — molecules known to trigger responses such as defense and sex in many animals." [Click to read the full article.](#)

**Study finds proof that humans react to pheromones:** March 11, (CNN) — "The power of smell is undeniable, as the multi-billion dollar perfume industry testifies. But is it possible that humans are influenced by airborne chemicals undetectable as odors, called pheromones?" [Click to read the full article.](#)

**Pheromones: Potential Participants in Your Sex Life:** June 25, (CNN) — "You've never heard of pheromones? Well, it's time to learn about the part they play in your sex life, because it could be substantial." [Click to read the full article.](#)

**Clues Behind Pheromones and Sex:** Sep. 5, (WebMD) — "Pheromones, those mysterious, scentless chemicals that some say drive human sexual behavior, have been studied for decades. But now researchers say they've finally found proof that mammals -- such as humans and mice -- are actually programmed to detect and use them. " [Click to read the full article.](#)

---

**We know you must have many thoughts running through your head right now. Here are the answers to the most commonly asked questions about Pherlure:**

**Q. What are pheromones?**

**A.** Pheromones are naturally occurring chemicals that send out subconscious scent signals to the opposite sex that trigger very powerful sexual responses.

**Q. How are pheromones detected?**

**A.** Pheromone signals are detected through an organ 3 inches inside the nose called the Vomeronasal Organ (VNO). When the VNO detects pheromones, it sends a sexual response signal to the brain.

**Q. What is VNO?**

**A. VNO Function: Pheromone Communication:** The Vomeronasal Organ or VNO is the receptor organ of a sensory system involved in chemical communication. Among mammals, sex Pheromones that advertise sexual readiness to potential mates are often, although not necessarily exclusively, detected by the VNO. Odors that are produced by one individual and detected by another of the same species are called "Pheromones" if the process is a real communication with benefit to both individuals. Sexual communication is only one example.

**Q. How come I haven't heard about this interesting new sense organ and human pheromones before?**

**A:** Because it's a recent discovery and the media is only beginning to report this scientific advancement! Although you may not have heard of pheromones and the VNO receptor yet, you will, They're fast becoming household words.

**Q. Is there any evidence to show that Pheromones are effective in attracting women?**

**A:** There is plenty of evidence. With the advances in science, the evidence that pheromones are effective in attracting women is growing rapidly. Check our [Media Reports Section](#) to do your own research.

**Q. How do you use pheromones?**

**A.** Pherlure is best applied directly on to your skin, on your pulse points (neck, wrist, behind ears). The biggest mistake made by beginners is putting on too much. Because of the concentration of Pherlure, only one spray is necessary. If you mostly want to affect women 30 or over, start with 1 spray, and then work your way up on different days... 2 one day.. 1 the next day... Don't start high and move your way back. To affect women under 30, stick with just 1 spray. Using more WILL NOT increase the effectiveness This also gives you more "bang for the buck". Obviously, by using less, you don't run out as fast. Using the least amount possible, you benefit by getting better results, at a much lower overall cost.

**Q. Do we give off pheromones naturally?**

**A.** Absolutely. We're chemically communicating with each other all the time. That's something many people don't realize.

**Q. If we produce our own pheromones, why do we need the help of a Pheromone Product?**

**A.** Because of our cultural habits. What do we do first thing in the morning? Take a shower. It washes off our pheromones! Consequently, we're phenomenally deprived. (Furthermore, we tend to dress from head to toe, thereby covering 90% of the very skin that releases pheromones into the air.) When we put on Pheromone Concentrate, we're actually replacing pheromones we've washed off. By supplementing our lost pheromones with Pheromone Concentrate, we're really "getting back to nature," and re-establishing chemical communication with people around us.

**Q. How long do they last?**

**A.** Our pheromones last approximately 4-8 hours when applied on appropriate spots.

**Q. What are the benefits of using your pheromone products?**

- More eye contacts and smiles from the opposite sex
- You will be found more sexually attractive
- More dates and sexual intercourse

- A rejuvenation of your current relationship
- More passionate lovemaking
- The opposite sex will feel more relaxed and at ease with you
- The opposite sex will start up conversation with you
- Increase your self confidence
- Same sex will intuitively respect you
- Better business / employment relationships

**Q. How do I order and is it secure?**

**A.** To order, go to the [order page](#). Our ordering system is online 24/7 and uses Secure Socket Layers (SSL) by VeriSign to encrypt all information you provide. SSL is the industry standard and the best software available for secure ecommerce transactions. You may also place your order with PayPal from our order page. PayPal is a secure third party payment processor which also uses SSL security and is actually owned by Ebay, one of the largest public internet corporations. A PayPal account is currently used by one in three online shoppers.

**Q. What are the terms of your 100% Money Back Guarantee?**

**A.** You have a full 30 days to try Pherlure to prove to yourself that it is as effective as we say it is. We are fully committed to your satisfaction and we will honor you a 100% full money back refund of the purchase price for any reason. **NO QUESTIONS ASKED!** Please read more about our 100% Money Back Guarantee [here](#).

**Q. How long does it take to receive my order?**

**A.** All orders are processed and shipped within 24 hours of placement. You will receive an e-mail with a tracking number as soon as we ship your order. Please allow 3-5 days to receive your order once it ships.

**Q. Can my pheromones package be shipped privately?**

**A.** Absolutely! We understand that your privacy is important to you. We ship all of our products in discrete, plain boxes with the return address listed only as ANR and with no identifying markings.

**Q. Do you ship Pherlure internationally?**

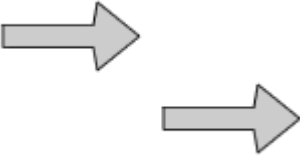

**A.** Yes, we do ship internationally to all countries accepted by PayPal and our credit card processor. We ship with USPS Global Air Mail and your order should reach customs in 7-10 business days. Please note that tracking numbers are not provided by USPS for international shipments. A customs form will be filled with "atomizer" as the contents and your order will be shipped carefully in a padded package..

**Q. What name will show up on my credit card statement?**

**A.** "ANR INTERNATIONAL INC" when you order with credit card, or "ANR-PAYPAL" if you use the PayPal payment option.

**Do you think Pherlure can work for you?**

**Here is just some of the recent feedback we have received:**

*"I've always had a problem approaching girls. They would just walk past me like I didn't exist. I sometimes felt like they purposely would not give me any attention just because they were snobby and stuck up. Now, when I use Pherlure Pheromones, it's alot easier to approach girls because THEY are usually the ones that will smile at me first or make eye contact."*

**Peter, Scottsdale, AZ**

*"I hadn't been on a real date for 2 years. After the first application of Pherlure, I noticed more people looking at me. Before long, I got up the guts to strike up a conversation with a nice looking girl, and sure enough I got her phone number. Looking to order another bottle when I'm done with this one."*

**Gary, Dayton, OH**

*"I was totally skeptical...in fact, I'm still having a hard time believing this stuff works so well. But I haven't seen so many smiles and so much attention in a long time. Something is happening with this product, I can't deny that!"*

**Andrew, Bakersfield, CA**

*"i just came back from bestbuy store and was just looking for a few DVDs and this pretty sales person walked up and asked if i need anything and i said just looking and the next thing i know shes asking me what my phone number was and what i was doing later tonight..... WOW!!!!!!!!!!!!!! this stuff is great."*

**RJ, Park Ridge, IL**

*"Hey, I just wanted to let you know that I bought one of your*

*Pheromone products, and the first day I used it, my girlfriend was an ANIMAL in bed! Man, she was doing things that I never thought she would do. We tried tons of new things/positions (all of which were great) and really rekindled the fire. Our past sexual episodes had been mediocre at best, but since I've been using your product, we have had a great time behind closed doors! This very well could have SAVED our relationship. VERY HAPPY with my purchase."*

**Markus, Cibilo, TX**

*"Finally a company that charges a fair price for a pheromone aphrodisiac that actually works. I tried 2 androstenone pheromone products before this and there's no comparison, their's failed and i'm very happy with the performance of Pherlure. Your product rocks!"*

**Glenn, British Colombia, Canada**

*"I thought I would drop you guys a line and let you know that I received the product and everything was good. I put some on my shirt before I went to the hardware store on Friday and the teller was smiling my way. It was kind of funny. Any way once this bottle is gone you can expect another sale from me!"*

**Steven, Yourktown, PA**

*"I didn't know such stuff existed, but I am pulling a lot more ladies with this pheromone. Pherlure has taken pride of place amongst my cologne collection. It's the last thing I put on before I go out for the evening. I'll surely be back for more as soon as I finish this bottle. I seem to be able to attract more women back to my flat more often. Before I was lucky if I pulled once a year!!!... now it's happening every time!!!! The Pherlure just amazes me with how much more looks, attention, flirting and great sex it attracts."*

**Allan, Manchester, UK**

*"Incredibly satisfied with your product. Works just as advertised. I work at a kiosk at the mall here, so I'm in contact with alot of women daily, and have had far better responses in getting eye contact, flirting, and getting numbers (even w/o asking!) since using Pherlure Cologne. Incredible stuff. Works just as well when I go out at night to the clubs. Sorry I can't give you any referrals, but Pherlure is MY secret weapon!"*

**Chris, Schaumburg, IL**

*"Dear Pherlure:*

*I don't know how it works, Yet the fact is, at 20 years older than my coworkers, Pherlure has completely removed that barrier. This evidence is strong enough for me to know there is a real effect, and that's priceless."*

**Richard, Carson, CA**

"So here is my testimonial, I ordered a bottle of Pherlure and it showed up a couple days later in the mail. Some friends were over when the mail arrived and right away they were asking me what this stuff was, so I told them. Right away they are on my case about buying some "love potion" and saying I was scammed. Of course, since I paid out the money I right away started to defend my purchase. My friends and I decided to go for lunch, so I put a couple sprays on to test it out. Well, we are at this restaurant and the waitress was being nice, which is expected since that is kinda her job. We are all finished up with the lunch and the waitress, straight out, asks me if I would like to go out with her and her friends to a show they are going to tonight!!! I was floored, I of course said yes.....and we have been dating ever since :). All I can say is Pherlure really works!!"

**Jason, Dodge City, KS**

"It was full money back guarantee so what did I have to lose. Anyway, a couple of days later it arrived, so I used only a spray on my shirt as recommended. I went to the bar, this woman, who I had seen in the bar a few times before but who had previously ignored me, was at the bar buying drinks alongside me and kept looking my way! I got up the courage and said "Can I buy your drink for you" - well after that it was all clear sailing."

**Tim, Bradenton, FL**

"This week, they sent me some pheromones in a bottle and I must say, I'm quite happy with the results. All I did was spray it on and let nature take its course. If you've tried just about everything to get the ladies and yet nothing has worked, here's something that will boost your confidence and have the women floating over to you."
