

Greetings! This is just me playing around and trying to learn L^AT_EX. I noticed that this thing automatically indents. Sweet! So I'm trying to fill up this paragraph so that it doesn't look gay.

Isn't latex a fun thing to learn? I think so, and right now, I'm just trying to fill up space so that I can see how the justified paragraph thing works with L^AT_EX.

L^AT_EX rocks this box. Oh hell yes it does. I'm going to test out the "Quote marks".

It is now time for the tilde test and hyphenation tests. ~ vs ~. - - — -.

It's -30°C out.

Testing out lists

1. Some rifles:

- - Sig SSG3000
- - Savage 10FP
- - Barrett M82A1

2. Some Shotties:

- Remington 870 Marine Magnum
- Benelli M4

3. Some handguns:

- Glock 23
- Springfield 1911
- Colt Commander
- Sig P226

4. Calibers for the above handguns:

Glock 23 .40S&W

Springfield 1911 .45 ACP

Colt Commander .45 ACP

Sig P226 9mm¹

¹Pussies use this caliber
