

GRA 310 Format and Validate Code Guidelines and Rubric

Overview: In this assignment, you will continue to build out the coding of your website by adding additional CSS styling. You will also validate your code.

Prompt: Apply your knowledge of CSS to your HTML file. Validate your code using the World Wide Web Consortium's (W3C) [Markup Validation Service](#) and the (W3C) [CSS Validation Service](#). Submit screenshots of your validation results and make any necessary changes to your code. Upload your file to your selected web hosting site and provide your instructor with a link.

Note: Additional resources have been provided for you in the Brand Style Guides folder. They include difficult-to-find fonts for the Town client and image resources for both clients.

Specifically, the following **critical elements** must be addressed:

- **Apply** knowledge of **CSS** to your HTML file.
- **Validate your code** using the W3C Markup Validation Service and W3C CSS Validation Service. Make any necessary changes to your code.
- **Upload** file to your web hosting site, and provide your instructor with a usable link to the file.

Guidelines for Submission: Upload your file to your selected web hosting site and provide your instructor with an accessible link. Submit one file to Brightspace that includes your screenshot JPGs.

Critical Elements	Evident (100%)	Not Evident (0%)	Value
Apply CSS	Submission includes CSS	Submission does not include CSS	45
Validate Code	Submission includes screenshots of validation results	Submission does not include screenshots of validation results	45
Upload	File is properly uploaded to a web hosting site and is accessible to instructor	File is not properly uploaded to a web hosting site and is not accessible to instructor	10
Total			100%
