SUMMARY

Software engineer and web programmer with over four years experience in developing intranet and client/server applications, using several different languages and tools. Ability to present ideas, resolve technical issues, and troubleshoot problems. Strong work ethic, good communication skills, and quick learner.

EXPERIENCE

August 2004 to
Present

Vonage, Edison, NJ

LNP Coordinator

- Processed and expedited orders for transferring phone numbers from local carriers to Vonage accounts.
- Researched and corrected orders with partner carriers to provide customers with status of transfer requests and reduce time in completing number transfers.

July 1997 to
November 2001

Fujitsu Consulting, Edison, NJ

Technical Consultant

AT&T (July 1999 – September 2001)

- Created and maintained several object-oriented subsystems in the customer sales and service application, used to order local and long distance services.
- Worked in large teams at the client site, and used proprietary technologies to create, unit test, and debug object models.

Verizon Wireless [Bell Atlantic Mobile] (December 1999 – February 2000)

- Assisted in development of a user interface which allowed the client to easily view and print customer invoices, using Visual C++ and IBM's OnDemand OLE control.

Exelon Energy Inc. (November 1998 – June 1999)

- Implemented all front-end screens, as well as some middleware functionality, for an Intranet application which simplified viewing and updating of customer information as well as an administration site, using Javascript and CGI.
- Documented navigation of a legacy billing system to use for screen scraping and retrieval of customer data.

UUNet [CompuServe] (October 1997 – October 1998)

- Developed key front-end functionality and intranet web pages for a three-tiered contract management application, including user profiles and document rules, using ASP and Active X components with COM objects.
- Maintained stored procedures and PL/SQL code which parsed business rules and handled data feeds from a legacy system to an Oracle database.

January 1997 to
May 1997

Web Expert Corporation, East Hanover, NJ

Web Developer

- Designed web sites for local businesses which displayed company products and allowed users to shop online, using Cold Fusion and Access database.
- Implemented a Java applet with JDBC to store and update new client data.
- Created graphics and images for web pages using Adobe Photoshop.

VOLUNTEER

October 2003 to Federation of East Village Artists, New York, NY
January 2005 **Web Programmer**

- Enhanced FEVA website by creating a dynamically generated weekly calendar of events and community bulletin board for local artists, using PHP and MySQL.

EDUCATION

Rutgers University, Rutgers College, New Jersey
B.A., Computer Science, May 1997
Minor: Psychology, Art

SOFTWARE

Oracle, MS Visual Studio, Macromedia Flash, Adobe Photoshop, MS Frontpage, Symantec Visual Café, Lotus Notes, 3D Studio Max.

SKILLS

C/C++	Java	OO A/D	PL/SQL
HTML	ASP	Perl / CGI	PHP
Visual Basic	VBScript	JavaScript	Cold Fusion

TRAINING

3DMirage, New York (Summer 2004)

- Training in computer animation using 3D Studio Max 6. Developed projects using various modeling, texture mapping, lighting, and animation techniques. Projects included logo, vehicle modeling and character animation assignments.

New York University, New York (Summer 2001)

- Multimedia course using Flash 5.0. Worked on several interactive animation assignments using graphic objects, movie clips, and ActionScript.

Sysoft, Edison, NJ (Summer 1999)

- Corporate webmaster course in DHTML, JavaScript, Cold Fusion, database programming other Internet technologies.

DMR FastTrack, Edison, NJ (Summer 1997)

- Training in C++, Orbix, Oracle, Java and Rational Rose.
