

### GRA 310 File Naming Worksheet

File Name	Good	Bad	Explanation
index.html	X		It names the first page to which will connect site to www.
page_1.html	X		Underscores are accepted because they are not a command symbol.
menu,red'.html		X	Characters like comma, apostrophes, <sup>↳ used in commands</sup> it's invalid - will cause errors.
web_names_good.html	X	X	It may be too complex, less "-" are better.
PageTwo.html	X	X	no capital letters, not recommended, may cause errors.
page"1".html		X	No quotes - used in commands only - this will cause errors
my favorite web page s .html		X	Same as ↓
my favorite web pages .html		X	No spaces - invalid name.
red-page.html	X		Recommended, will work as file name.
page"1".html		X	Same as above
page-two.html	X		Hyphen appropriate
pagetwo.html	X		Actually recommended - very simple - will work
page_1		X	no file extension - where is HTML?

-RED?

page(2).html	X	X	Alphanumeric <u>only!</u> - will cause errors ( ) are used in coding
menu_red.html	X		underscore is accepted, will work.
home<page>.html	X		Illegal character. Used for commands only, not file names - will error.

Note: All naming of files should start with a letter. Short name = simple.
