## Application for the Position of Engineer

Dear Madam or Sir,

I wish to apply for a position as engineer and feel that my qualification for a position in the field of IT would be of interest to your company.

I got my Master Degree in Electrical Engineering/System Design and Technology from Fachhochschule Darmstadt in 2003, and my Bachelor Degree in Computer Science in China in 1996. Five years professional experience in industrial area and two years experience in German companies will help me a lot to start and achieve success at the new position.

I consider myself to be an organized person, have a willingness to learn, friendly, pride myself on my initiative and am able to work to capacity even under pressure. I have the skills and qualities, such as business knowledge, programming language and project management, which you require for the position.

I have attached a curriculum vitae and I hope you will consider my application. I would welcome the opportunity for an interview to discuss my qualifications. I can be available anytime, in Germany, at your convenience.

Please don't hesitate to contact me, if you have something want to know about me.

Thank you very much for your patience.

Best regards,

Yours faithfully,

---

(Jimao Zhong)
