

## YOUR METRALLA MK2

The Metralla Mk2 is built for the advanced motorcycle enthusiast who demands the very utmost in high-speed performance and handling. The power curve of the engine and the ratios of the five-speed gearbox are matched to provide the best possible acceleration all the way up to the top speed... about 103 mph. (Applying excessive power too quickly in the first two or three gears will result in rear wheel spin).

The Metralla Mk2 frame was primarily designed for road-racing; it is both rigid and lightweight. Each frame is hand-aligned to make certain that the steering is accurate and steady. The suspension and wheels were designed to hold a precise line through a

We at CEMOTO are motorcycle enthusiasts. We constantly endeavor to design and build each Bultaco motorcycle to deliver the maximum in handling and performance for its particular task. With this thought in mind, we have built the Metralla Mk2 to provide

your new motorcycle. For your first ride, please read this entire manual thoroughly... by following its instructions, you will receive many years of enjoyment from your Metralla Mk2.
