

## DAFTAR ISI

|                         | Hal |
|-------------------------|-----|
| Judul .....             | i   |
| Lembar Pengesahan ..... | ii  |
| Abstrak .....           | iv  |
| Kata Pengantar .....    | v   |
| Daftar Isi .....        | vii |
| Daftar Gambar .....     | xi  |
| Daftar Tabel .....      | xii |

### BAB I PENDAHULUAN

|                                 |   |
|---------------------------------|---|
| 1.1 Latar Belakang .....        | 1 |
| 1.2 Tujuan Kerja Praktek .....  | 2 |
| 1.3 Pembatasan Masalah .....    | 2 |
| 1.4 Metodologi Penulisan .....  | 2 |
| 1.5 Sistematika Penulisan ..... | 3 |

### BAB II PT TELKOM

|                                             |    |
|---------------------------------------------|----|
| 2.1 Sejarah PT TELKOM .....                 | 4  |
| 2.2 Visi dan Misi PT TELKOM .....           | 6  |
| 2.2.1 Visi PT TELKOM .....                  | 6  |
| 2.2.2 Misi PT TELKOM .....                  | 6  |
| 2.3 Strategi Bisnis PT TELKOM .....         | 6  |
| 2.3.1 <i>Multi Service Bundling</i> .....   | 6  |
| 2.3.2 <i>Service Excellent</i> .....        | 6  |
| 2.3.3 <i>Build Business Scale</i> .....     | 6  |
| 2.3.4 <i>Strong Financial Growth</i> .....  | 7  |
| 2.4 Kepemilikan Saham PT TELKOM .....       | 7  |
| 2.5 Struktur Organisasi .....               | 7  |
| 2.6 Struktur Organisasi PT TELKOM .....     | 9  |
| 2.7 PT TELKOM Divre IV Jateng dan DIY ..... | 9  |
| 2.7.1 Direktorat Operasi .....              | 11 |
| 2.7.1.1 <i>Network Operation</i> .....      | 11 |
| 2.7.1.2 <i>Out Site Plant</i> .....         | 11 |

|         |                                                           |    |
|---------|-----------------------------------------------------------|----|
| 2.7.1.3 | <i>Information System</i>                                 | 11 |
| 2.7.1.4 | <i>Network Utilization &amp; Integration Interconnect</i> | 11 |
| 2.7.1.5 | <i>District Field Group</i>                               | 12 |
| 2.7.1.6 | Struktur Organisasi Direktorat Operasi                    | 12 |
| 2.7.2   | Struktur Organisasi <i>Information System</i>             | 13 |
| 2.7.2.1 | LAN/DCN                                                   | 13 |
| 2.7.2.2 | <i>Help Desk</i>                                          | 13 |
| 2.7.2.3 | <i>Special Project</i>                                    | 13 |
| 2.7.2.4 | <i>Group Deployment</i>                                   | 14 |
| 2.7.2.5 | <i>Operational System</i>                                 | 14 |
| 2.7.3   | DCN                                                       | 14 |

### **BAB III KOMUNIKASI DATA DAN JEJARING KOMPUTER**

|         |                                                  |    |
|---------|--------------------------------------------------|----|
| 3.1     | Komunikasi Data                                  | 16 |
| 3.2     | Jejaring ( <i>Network</i> ) Komputer             | 17 |
| 3.2.1   | <i>Host</i> atau <i>Node</i> (Simpul)            | 17 |
| 3.2.2   | <i>Link</i>                                      | 17 |
| 3.2.3   | Perangkat Lunak ( <i>Software</i> )              | 18 |
| 3.3     | Keuntungan Penggunaan Jejaring Komputer          | 18 |
| 3.4     | LAN ( <i>Local Area Network</i> )                | 19 |
| 3.4.1   | Komponen-komponen Dasar LAN                      | 19 |
| 3.4.1.1 | <i>Workstation</i>                               | 19 |
| 3.4.1.2 | <i>Server</i>                                    | 19 |
| 3.4.1.3 | <i>Client</i>                                    | 20 |
| 3.4.1.4 | <i>Link</i> (Hubungan)                           | 20 |
| 3.4.1.5 | <i>Transceiver</i>                               | 20 |
| 3.4.1.6 | <i>Network Interface Card</i> (NIC)              | 20 |
| 3.4.1.7 | <i>Software Network/Network Operating System</i> | 20 |
| 3.4.2   | Komponen Pendukung LAN                           | 20 |
| 3.4.3   | Topologi                                         | 21 |
| 3.5     | Infrastruktur Jejaring                           | 23 |
| 3.5.1   | Perangkat Keras ( <i>Hardware</i> )              | 23 |
| 3.5.2   | Protokol Jejaring                                | 23 |
| 3.6     | Konsep Alamat IP                                 | 24 |

|       |                                                                                      |    |
|-------|--------------------------------------------------------------------------------------|----|
| 3.6.1 | Struktur Alamat IP .....                                                             | 25 |
| 3.6.2 | Alamat Khusus .....                                                                  | 27 |
| 3.7   | Model Referensi OSI ( <i>Open System Interconnection</i> ) dan<br>Standarisasi ..... | 29 |
| 3.8   | TCP/IP .....                                                                         | 32 |
| 3.8.1 | TCP/IP Layer .....                                                                   | 32 |
| 3.8.2 | Network Interface Layer .....                                                        | 32 |
| 3.8.3 | Internet Layer .....                                                                 | 33 |
| 3.8.4 | Transport Layer .....                                                                | 34 |
| 3.9   | Ethernet .....                                                                       | 34 |
| 3.10  | Hubungan Referensi Model OSI dengan Protokol Internet .....                          | 36 |

#### **BAB IV HIGH BIT-RATE DIGITAL SUBSCRIBER LINES (HDSL)**

|         |                                                                   |    |
|---------|-------------------------------------------------------------------|----|
| 4.1     | Teknologi Akses xDSL ( <i>Digital Subscriber Lines</i> ) .....    | 37 |
| 4.1.1   | DSL ( <i>Digital Subscriber Lines</i> ) .....                     | 38 |
| 4.1.1.1 | Riwayat DSL ( <i>Digital Subscriber Lines</i> ) .....             | 38 |
| 4.1.1.2 | Metode Penyandian ( <i>Coding</i> ) DSL .....                     | 39 |
| 4.1.1.3 | Jenis-jenis DSL .....                                             | 40 |
| 4.1.2   | HDSL ( <i>High Bit-rate Digital Subscriber Lines</i> ) .....      | 40 |
| 4.1.3   | SDSL ( <i>Symmetric Digital Subscriber Lines</i> ) .....          | 41 |
| 4.1.4   | ADSL ( <i>Asymmetric Digital Subscriber Lines</i> ) .....         | 41 |
| 4.1.5   | VDSL ( <i>Very High Bit-rate Digital Subscriber Lines</i> ) ..... | 41 |
| 4.2     | HDSL ( <i>High Bit-rate Digital Subscriber Lines</i> ) .....      | 42 |
| 4.2.1   | Definisi dan Aplikasi Utama .....                                 | 42 |
| 4.2.2   | Informasi Teknis .....                                            | 43 |
| 4.2.3   | Struktur <i>Transceiver</i> HDSL .....                            | 44 |
| 4.2.4   | Parameter <i>Transceiver</i> .....                                | 46 |
| 4.2.5   | <i>Line Coding</i> .....                                          | 47 |
| 4.2.6   | Keuntungan dan Kekurangan HDSL .....                              | 48 |

#### **BAB V IMPLEMENTASI HDSL MENGGUNAKAN XDSL BRIDGE DAN LTU/NTU**

|     |                                                         |    |
|-----|---------------------------------------------------------|----|
| 5.1 | Pendahuluan .....                                       | 49 |
| 5.2 | Konfigurasi Jejaring HDSL di PT. TELKOM Divre IV Jateng |    |

|                                                                                                                             |    |
|-----------------------------------------------------------------------------------------------------------------------------|----|
| dan DIY .....                                                                                                               | 52 |
| 5.3 Implementasi HDSL Menggunakan xDSL <i>Bridge</i> dan LTU/NTU ....                                                       | 54 |
| 5.3.1 WireSpan 5000B xDSL <i>Bridge</i> .....                                                                               | 54 |
| 5.3.1.1 Menentukan <i>Data Rate</i> .....                                                                                   | 55 |
| 5.3.1.2 Fungsi .....                                                                                                        | 55 |
| 5.3.1.3 Spesifikasi Teknis .....                                                                                            | 56 |
| 5.3.1.4 Definisi Pin .....                                                                                                  | 56 |
| 5.3.1.5 <i>Port Console</i> .....                                                                                           | 57 |
| 5.3.1.6 Deskripsi Panel .....                                                                                               | 58 |
| 5.3.1.7 DIP <i>Switch</i> .....                                                                                             | 59 |
| 5.3.1.8 Koneksi Kabel .....                                                                                                 | 60 |
| 5.3.2 LTU/NTU CopperTrunk II HDSL <i>System</i> .....                                                                       | 60 |
| 5.3.2.1 CopperTrunk II HDSL <i>System</i> .....                                                                             | 60 |
| 5.3.2.2 Aplikasi .....                                                                                                      | 61 |
| 5.3.2.3 CopperTrunk II HDSL <i>Shelf</i> .....                                                                              | 62 |
| 5.3.2.4 CopperTrunk II HDSL <i>Line Card</i> .....                                                                          | 63 |
| 5.3.2.5 Modem CopperTrunk II HDSL <i>Stand Alone</i> .....                                                                  | 63 |
| 5.3.2.6 E1 Transmission/Transmisi E1 .....                                                                                  | 64 |
| 5.3.2.7 <i>Data Communication Services</i> (Nx64 to Nx64,<br>E1 to Nx64, 10BaseT to Nx64, atau 10BaseT to<br>10BaseT) ..... | 65 |
| 5.3.2.8 Operasi <i>Point to Multi-Point</i> .....                                                                           | 65 |
| 5.3.2.9 Spesifikasi dan <i>Option Interface</i> .....                                                                       | 66 |
| 5.3.2.10 Operasi dan Pemeliharaan pada <i>Stand Alone, Line<br/>Card dan Shelf</i> .....                                    | 67 |
| 5.3.2.11 <i>Power Supply</i> .....                                                                                          | 67 |
| 5.3.2.12 Fisik .....                                                                                                        | 68 |
| 5.3.2.13 <i>Environmental Stand Alone, Line Card, Shelf</i> .....                                                           | 68 |
| 5.3.3 Instalasi Perangkat LTU/NTU CopperTrunk II HDSL<br>System .....                                                       | 68 |
| 5.3.3.1 Persiapan .....                                                                                                     | 68 |
| 5.3.3.2 Pemasangan <i>Link</i> HDSL .....                                                                                   | 70 |
| 5.3.3.3 Prosedur Pengetesan .....                                                                                           | 71 |

## **BAB VI KESIMPULAN DAN SARAN**

|                      |    |
|----------------------|----|
| 6.1 Kesimpulan ..... | 80 |
| 6.2 Saran .....      | 81 |

|                             |           |
