

# Where are my Applications?

I try to set up your desktop, with all the shortcut buttons for your most used applications.

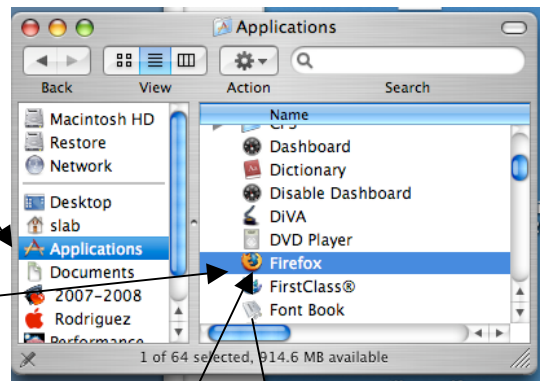

If your desktop is not showing what you need, get them from the hard drive.

## Find your application

1. From the dock, click on the *Finder Guy* →

2. At the sidebar, click on *Applications*

3. Find your application (ex: Firefox).

4. You can double-click it, to open it from there.

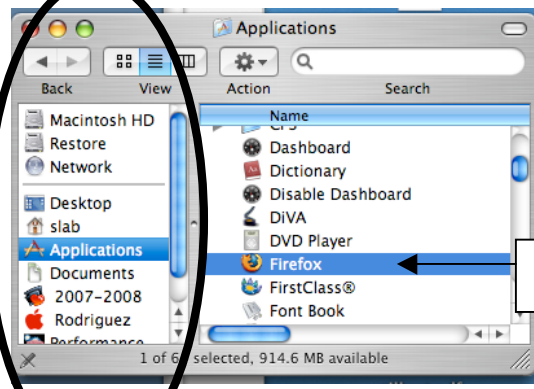

Drag icon

## Making shortcut buttons for your applications.

1. You can try dragging the application to your desktop to create a shortcut button.

2. Or, you can highlight the application and go to *Menu Bar* (at the top of the screen, with the blue apple and click on *File->Add to Sidebar*, to put in the sidebar.

Highlight
