

John F. Petrie III, MBA, CISSP, CISM, CHS-III, CBM

Chief Information Security Officer

Biographical Summary

Mr. Petrie is a 26 year seasoned Technologist and Information Security Professional with solid senior management experience in the Manufacturing, Financial Services, Defense, Technology Consulting, Telecommunications, and Academic Healthcare industries.

As the Chief Information Security Officer for Harland Clarke, he leads the Information Security Office and manages the Corporate Information Security Program (ISP), which supports check manufacturing and check-related services, contact center services and direct response marketing solutions as well as 6000 knowledge workers. Mr. Petrie's responsibilities include: information security strategy; information security policy development; risk management, analysis and mitigation; computer incident management; security monitoring; business impact analysis; business continuity and disaster recovery; technology analysis and review; training and awareness; and enterprise information security operations.

Prior to Harland Clarke, Mr. Petrie was the Chief Information Security Officer for the University of Texas Health Science Center, San Antonio responsible for the Institutions' Information Security Program. He has held various positions in the information technology and information security industry including, senior project manager, senior systems security engineer, general manager, director, and principal consultant.

Mr. Petrie received an MBA in Information Systems from City University, a Bachelors of Science in Liberal Arts from the University of the State of New York, and is a graduate of the Defense Intelligence College in Washington D.C. He holds multiple industry certifications including Certified Information Systems Security Professional (CISSP), Certified Information Security Manager (CISM), Certified Homeland Security-Level III (CHS-III), and Certified Business Manager (CBM).

Mr. Petrie is a member of several associations and organizations including the Accredited Standards Committee (ASC) X9F, Computer Security Institute, Information Systems Security Association, Information Systems Audit and Control Association, the American Management Association, the Association of Professionals in Business Management, and is the Past Treasurer Member of the Northeast Independent School District Career and Technology Advisory Council.
