

GREEN AWARENESS TRAINING

Johnstone Supply of Philadelphia, in association with Esco Institute, shall be conducting a one-day classroom program and green awareness for HVACR mechanics.

Every day the word 'Green' enters our lives. We read about Green in the news, we see it on TV and we hear about it on the radio, but what is it and how does it affect us?

When it comes to mechanical, (HVAC, Plumbing and Electrical) 'Green' means maximizing the energy efficiency of existing equipment, specifying the most efficient systems available for the application and the available budget, using renewable and sustainable fuel sources, and conserving water.

This class teaches contractors and technicians to be aware of the various methods employed in reducing energy consumption and conserving water and how they can expand their business by helping the customer be more GREEN.

Date: Wednesday, October 28, 2009

Location: Johnstone Supply of Philadelphia – 4700 Wissahickon Ave., 19144
