

CARBON MONOXIDE TRAINING AND CERTIFICATION EXAM

Johnstone Supply of Philadelphia, in association with Esco Institute, shall be conducting a one-day classroom program and Combustion Analysis and Fuel Efficiency certification test for HVACR mechanics.

When installing new equipment and servicing existing systems, it is important to make sure the systems are operating within the measurable definitions of the equipment manufacturer and local code. Proper installation of combustion systems and thorough inspections can reduce loss of life, illness related to combustion by-products, property damage, liability and help reinforce confidence in consumers.

Persons installing and/or servicing combustion equipment and must possess a solid understanding of the cause and effects of CO.
