

Duman Ranch

CKC Registered
Chihuahuas (Deer Type)
Ruby and Denise King

Shots: All puppies have the first set of shots at 6-7 weeks of age, along with regular wormings starting at 3 weeks of age.

Deposits: all deposits are 100% refundable should anything happen to the puppy while in my possession or if I decline to sell a puppy to you due to suitability issues. Deposits are not refundable if buyer changes his/her mind on the sale.

Health guarantee: I guarantee my puppies are healthy to the best of my knowledge, however I can't guarantee any health problems or defects that cannot be detected by a veterinarian at date of purchase. **I do not recommend taking puppies to pet shops or pet stores - they can easily come in contact with severe, airborne diseases that puppies do not have much chance against, and some grown dogs have problems with.**

Hypoglycemia: Chihuahuas are occasionally subject to a condition none as Hypoglycemia (Too low a level of glucose (sugar) in the blood. This occurs when a puppy has eaten too little food, or has exercised excessively without extra food. A person or puppy with hypoglycemia may feel nervous, shaky, weak, or sweaty, and have a headache, blurred vision, and hunger. Taking small amounts of sugar, sweet juice, or food with sugar will usually help the person feel better within 10-15 minutes). We can not tell which puppies may have this condition because we free-feed at the house and all Dumans are allowed to eat however much they need at any given time. When you take your Duman home, you may change this feeding policy. If you do, and you notice that your puppy is lethargic, or limp - please give them a small amount of **Karo Syrup**. This should stabilize their blood sugar and bring them back to normal. If this happens, you may want to leave food down all of the time, or increase your feedings during the day. Most often, they grow out of this when they grow up.

Sinus problems: Most Chihuahuas have sinus problems were their eyes water, or they cough. My vet recommended giving them plain pink Benedryl pills that you can buy over the counter.

To validate guarantee

- *Purchaser must have puppy examine by a veterinarian within 48 hours from sale, extended time is allotted for weekends, or extensive driving time.
- *Should your veterinarian find a serious defect, I must be notified the same day, then presented with a written statement from the examining vet. The puppy will be exchanged for a comparable puppy when one is available.
- *I reserve the right to have the puppy re-examined by my vet.
- *Serious incurable defects only will constitute in the exchange of a puppy.
- *I have no guarantee on size, color, or breeding capability.
- *All vet bills are the responsibility of the buyer.

***If a time comes when you can no longer keep your puppy even after it has grown up, I will be happy to take it in until a loving adoptive home can be found, respectfully I can not refund any money, only the assurance you treasured pet will not find it's way to a pound, or shelter.**
