

# Display Board Colors

When you are choosing your display board colors, use a color wheel. Try not to use more than 2 or 3 colors so that the display board doesn't feel too busy.

## Methods

1. **Monochromatic.** Choose one color and one or more lighter hues or darker shades.
2. **Analogous.** Choose two to three colors that are next to each other on the color wheel.
3. **Complementary.** Choose two colors that are directly opposite each other on the color wheel.
4. **Split complementary.** Choose any color, then look at the two colors on either side of the color directly opposite the first color.
5. **Triadic.** Choose three colors that are evenly spaced from each other.
