

Dream your way to  
younger looking skin.  
While you're sleeping, it's working!

Want to know the secret to more youthful skin? Just sleep on it! Introducing Jafra's new Wrinkle Treatment Patches. One little moon-shaped patch under each eye targets wrinkle zones directly, provides a concentrated dose of moisture and guards against the breakdown of collagen to reduce the appearance of wrinkles. You'll wake up looking terrific!

*"Between working long hours and taking care of my two daughters, I knew I wasn't getting enough rest. Then I started to see puffiness and tiny lines around my eyes and I really started to worry! My Jafra Consultant suggested their new Wrinkle Treatment Patches. Not only were they cooling and soothing on my skin, but a few nights later I noticed they softened all those little creases! Now I don't have to lose sleep over it!"*
