

Add/Subtract Weather Small Group Projects

Name: _____

Week: _____

Weather Data Collected and Add/Subtract Problems Used: _____

Categories	Excellent = 4	Good = 3	Satisfactory = 2	Needs Work = 1
Reads Weather data with Partner	Each partner works together and uses web with each other.	Some work and some use of web.	A little work and a little use of web.	Few or no weather found with each other. No calendar or problems are made.
Find and List New Weather and Add & Subtract Problems	Quiet, working on own, update data, then comparing add and subtract problems together.	Some quiet work, some updating, some problems compared.	Little quiet, a little data on calendar. A little bit of comparing.	No quiet time, no comparing, no new data.
Practice Add & Subtracting with Partner	Finding data and math that the partner knows and learning from each other by practicing together.	Some practice, find a little data known by other, learn some new.	Very little practice time, few new math problems learned.	No practice time is completed.
Report the data with Group	Groups finish by reporting to each other both weather data and math problems.	All students read to each other but only some data.	Only some people get to read. Incomplete group data.	Groups do not finish and do not have group data and problems completed.
