

SAVINGS

This worksheet shows the amount of savings one gets from using

EXTREME Power Energy ~ More Power! ~ Run Faster! ~ Save Money!

RM = Ringgit Malaysia

KM = Kilometers

Cost of Petrol = RM 1.80

Tank Volume = 40 litres

Normal Usage:

Per Tank = RM 72.00
Per Tank Usage Week = 1 week
Cost of Power Energy = RM 500.00
Savings from Power Energy = 20%

KM per 3 Months = 5000 km ~ normal vehicle servicing schedules
OR = 416.67 km/wk (over 120 days or 4 weeks/month)

Next Power Energy Change = 80000 km

=> Change occurs at Month 48th or 4 years

OR 192 weeks (4 weeks/month) or 208 weeks (52 week/year)

Savings of 20% => RM 72.00 x 20/100 = RM 14.40 per tank

=> Per Week Saving = RM 14.40

= 14.40/1.80 = **8 petrol litres saved/week!**

=> Per 80000km saving = RM 14.40 x 192 weeks = RM 2764.80 (4 weeks/month)

OR = RM 14.40 x 208 weeks = RM 2995.20 (52 weeks/year)

NETT SAVINGS => RM 2764.80 or RM 2995.20 !!

Break Even Savings occurs at Cost/Savings = RM500/RM14.40

= 34.72nd week or 0.67 years or 8.7th month
