ABSCESSED TOOTH

On a Monday early March 2001, I had my left eyetooth filled.

The Dentist had serious doubts that he had the problem resolved, warning me that he considered I most likely need a root canal filling. He stressed to come back immediately if I had any pain.

On the Wednesday morning I awoke to a pretty sore tooth, but I delayed going to the dentist, as sometimes a freshly filled tooth can be quite sore as it settles. By nightfall I was in deep trouble and could not even chew the softest food. The pain went up my cheek into my eye.

I then started taking 4 Transfer Factors+ every 3 hours (12 capsules by midnight).

The morning broke with the pain considerably reduced so I kept the pressure on by continuing to take 4 Transfer Factors+ every 3 hrs.

By nightfall the pain had gone completely and I have not been back to the dentist for that tooth since.

Then in August a double molar suddenly made itself known to me. I could not eat any food on my right side, and even had to stop for spells to let the pain settle down. Again the pain ran up into the eye area.

I successfully used the same formula of 4 Transfer Factors+ every 3 hrs and within 24 hours the pain had gone and has not returned.

While it took 1/2 a bottle of Transfer Factors+ on each occasion, it was considerably cheaper than going to a Dentist!

Michael Anderson

ACNE

I have suffered from bad acne for many years. I have tried all sorts of different skin care and beauty products to help clear it up. I have also covered it with makeup (which only made it worse) because I was so embarrassed of how my face looked.

I decided to try a skin care range with Transfer Factors.

I started to see results after about 5 days of using the system that consists of a cleanser, day moisturiser and a night serum. My skin looked clearer and free of acne.

Now I feel so much better about my skin that I often go without any make up at all.

My husband and family all can't believe the results and it has given me much more confidence.

I recommend anyone who has concerns with their skin to try the skin care range with Transfer Factors.

Rachael Day

ALLERGIES

This is the time of the year that I am usually driven crazy by the effects of the Privet tree flowers, and other non specific pollen that is in the air.

I have year after year had to put up with a running nose, stinging eyes, nausea, and an overall feeling of being ill until the flowers disappear.

And while I notice that the Privet tree next to our carport is in full flower (as are several in the neighbouring sections on both sides), this year I am quite free from any allergic reactions at all.

I can only put it down to the fact that I have been taking Transfer Factors+ since July last year.

Apart from occasionally waking up with a blocked nose that quickly clears, I have had no other symptoms that I have been used to putting up with.

I thoroughly recommend that anyone who has trouble with allergies of any kind consider taking Transfer Factors as a way of being free of these energy sapping allergic symptoms.

Terry Conlan
Registered Nurse

ALLERGIES

I have been an allergy sufferer for approximately 10 years. Every year around October my eyes, ears, nose and throat were all badly affected.

Over time the condition worsened so that I could not even open my eyes some days. The whites would swell up like jelly. I always felt as if I had a full-on head cold for six months of every year and this would wear me right down.

I was unable to sit on grass, near a beach or in the garden, and I certainly wasn't able to cut the grass with the lawnmower that I had previously enjoyed.

You see my allergy is to grass.

I lost a lot of sleep at night because my nose was always blocked in the lying position.

In October 2000 I started to take 9 Transfer Factors every day during the worst of the allergy season and I honestly felt so much better. And even better, my energy levels picked up immensely.

I didn't end up in welts last year, which would normally happen a couple of times each season.

So, I would like to let any allergy sufferers out there know that this product really is wonderful and has changed the way I feel about October to February of every single year.

Thank you.

Ray MacKay

ANAEMIA (SIDEROBLASTIC)

Eighteen years ago I came down with a bad viral flu and ended up with acquired Sideroblastic Anaemia, a rare blood condition where many of the red corpuscles do not absorb iron hence a lack of energy and an overload of iron.

I was also prone to infections proving my immune system was compromised. I would get a cold and usually ended up with a secondary infection and would need antibiotics.

Six months ago I started taking Transfer Factors+, 2 capsules per day, and soon noticed more energy as time went on. I found by just stepping up my maintenance dose to 6 capsules per day I could throw off sore throats. If I contracted a cold I would only have it for a few days where once it would be for weeks.

Sinus problems that I also suffered are now a thing of the past. My blood tests are improving too.

I am so thankful to God for bringing Transfer Factors across my path as I had tried many things with only limited success.

Croydon Fitness

ANIMAL BITE

Last month I was bitten by a wild feral cat on my farm. My finger soon swelled up like a balloon and began to throb.

I had just started taking Transfer Factors+. My brother - who had convinced me to try it - called to ask if anything had happened for me. I told him I had been bitten, and that it was so sore and swollen that I was on my way to get a shot from the doctor when he rang. He told me to take 5 Transfer Factors+ with at least 2 big glasses of water and then to do the same again the next day.

Being very sceptical, it took my brother quite a lot to convince me. I finally promised to give it a go, but only until the next day! He insisted that I call him with the results either way.

I was amazed by the fast results. I called him and told him that if it weren't for the puncture wounds still very visible on my finger, I would never even know I had been bitten. The swelling and pain had completely gone!

At the same time I had a side effect that I had not expected.

For over 30 years I had breathed through my mouth because my nose was always blocked. Suddenly my nose cleared up and I could breathe through both of my nostrils!

I now have to admit I am very grateful to my brother for introducing me to Transfer Factors.

Noel Henriksen

ARTHRITIS

I am an active 70-year-plus lady with arthritis. I play tennis and golf, but have had to wear a support for weakness in my left wrist. I have suffered with arthritis for many years.

A good friend of mine introduced me to Transfer Factors and here's what happened.

I had decreased swelling and pain within 7-10 days, and after only two weeks, I removed the support altogether. Within four weeks I had 80% more use overall!

Now I know everyone's system is different, but I can feel that my immune system has been dealt to, causing inflammation build-up to clear away. The only problem now is that my golf swing is rubbish because I have more free movement! Still, I guess you can't have everything.

A bonus for me was taking just one capsule immediately before playing golf, and having my sinuses clear within 1 hour and staying that way for the rest of the day. Again I put this down to my immune system being boosted up.

When I have the grandkids to stay, I have them take Transfer Factors for colds etc. It clears them up like antibiotics (only better - because antibiotics don't help our immune system long term). I have Transfer Factors on-hand all the time because it's natural- not drugs.

Everyone should get some of this product - it's great.

Hema Tata

ARTHRITIS

I have suffered with arthritis in my lower back and knees for eight years, stopping me from living a full life and always in pain, sometimes chronic.

Not liking to take painkillers and always looking for alternatives I was impressed with the natural elements of the Fibro DayTime formula.

After taking them for less than a month the pain eased and in less than three months the pain had gone! For me – great success.

Alison McLaren

ARTHRITIS

Around 45 years of age I developed Arthritis and severe joint pain and swelling in my left ankle and fingers. My doctor prescribed Voltaren, and although this stopped the pain, it affected my stomach and digestion.

I had to give up my two major leisure activities - windsurfing and guitar. I even had trouble walking with the pain. The scariest thing was that each time it flared up – about every six weeks - it was worse than the time before and I didn't know how bad it was going to get.

Somebody introduced me to Pycnogenol Maritime Pine bark extract, and it seems funny saying it even now, but the fact is that ALL the pain and swelling in my ankle disappeared in just seven days. I have never had it back again. My fingers took more time – around nine months or so. I am now back both windsurfing and playing guitar again.

I take 3 Pycnogenol Maritime Pine Bark and 2 Transfer Factors a day for maintenance and could not imagine a day where I would not take these two products.

To say they changed my life would be an understatement indeed!

Barry Blake

ARTHRITIS

I developed serious arthritis after badly smashing my hip and knee in a car accident. I developed a limp and was on ACC for over four years. It used to take me about 20 minutes of exercises just to get out of bed in the mornings.

My son introduced me to Pycnogenol Maritime Pine Bark extract, and it truly does sound strange to say this, but after just seven weeks the pain disappeared completely and I had no limp.

I also feel (and look?) younger every day and have more energy than I know what to do with. I am 75 and currently line-dance for up to 15 hours per week. Some of the young ones have trouble keeping up with me!

I only take 2 Pycnogenol Maritime Pine Bark capsules a day to get this incredible result and would truly recommend this product to everyone.

I also take 2 Transfer Factors+ per day for preventative purposes and now I rarely get the colds I used to have last three or more months at a time. On the rare occasion I do get a cold, it clears up quite quickly.

Eva Blake

ARTHRITIS

Several years ago I noticed dreadful, lingering pain in my fingers – especially if I did something like accidentally knocking them on a door or cupboard when passing. Also the increasing pain and swelling of the joints in my fingers was interfering with my hobby of painting.

I was introduced to Pycnogenol Maritime Pine Bark extract and decided to try some.

Nobody told me to build up slowly to the full daily dose so I just started from day one on the full eight a day. But I had no side effects except for great ones!!

Within a couple of weeks all the pain had gone!

I now take three Pycnogenol Maritime Pine Bark extract a day. In addition I also take Transfer Factors. I am happy to say that I am free from the pain of arthritis and really enjoy feeling great!!

Jan Du Flou

ARTHRITIS

I suffered with arthritis in my fingers - knobs on my knuckles were red and sore and my hands always felt swollen. The pain was like glass sticking into me.

I could never get comfortable, and had to sleep with my hands dangling over the side of the bed or resting above my head on the pillows.

My old sports injuries seemed to be highlighted as well and this pain was having a detrimental effect on my health and wellbeing. Some days I couldn't even take the roasting dish out of the oven. I needed something!

I started taking Transfer Factors & Pycnogenol Maritime Pine Bark extract in October 2002.

Within the first 2 weeks, the pain, swelling and redness in my hands subsided and I was able to flex my fingers and twist my wrists - something I had found extremely difficult to do before.

Today I am happy to say that the symptoms have all but disappeared! It is now February 2003 and I am pain free.

These natural products have been a lifesaver for me in more ways than one and I am very grateful.

Pauline Tangohau

ARTHRITIS & HEART PROTECTION

For a number of years I had been experiencing increasing pain and reduced movement in both of my hands. My finger joints were so painful at times that I had to consider giving up playing golf! (a tragedy that was totally unacceptable).

I started using Pycnogenol Maritime Pine Bark extract and within three-and-a-half weeks I had no pain. 2 capsules per day have not reduced my golf handicap – but it has certainly removed the pain. I also take Pycnogenol Maritime Pine Bark extract for its effectiveness in keeping arterial plaque at bay. I want to prevent a heart attack, not just wait to have one!

I had also been taking a slow release antibiotic every day for 14 years for a long-term health challenge. I decided to stop destroying my liver (the pharmacist who had dispensed the anti-biotic finally told me that's what it was doing to me!) and use a natural alternative. I now take 2 Transfer Factors+ a day – get the same result - and no antibiotics!

Bill Perrins

ASTHMA - CHRONIC

I've had severe asthma for 15 years.

I have even ended up in hospital with attacks, and would be taking my preventive inhaler continuously.

I have been on Transfer Factors and an OPC antioxidant for just four weeks now, and now I find I'm not having to use my inhalers at all.

Maree Jewell

ASTHMA - CHRONIC

At age 3, I was classified as a chronic asthmatic.

This was so serious for me that for much of my life I have been a Greenlane Hospital Asthma Clinic guinea pig for new drugs and steroids.

The three times in my life that I tried to get off my drug regime, I ended up in the operating theatre being shocked back to life.

My lifetime daily drug regime included steroids like Prednisolone and strong drugs like Theophylline to relieve symptoms.

A friend suggested I try a special antioxidant extract from the bark of the Maritime Pine Tree. The results continue to amaze me every day. Almost immediately my circulation and colour improved. Then patches of psoriasis cleared up. My need to rise several times a night disappeared, and then after 6-8 weeks, my chest and asthma cleared. I had so much improvement in so many different areas.

I have since eliminated all steroids and drugs for my asthma. The only thing I now use is a very mild preventative puffer when occasionally required.

My energy is back and I am very grateful for my daily dose of Pycnogenol Maritime Pine Bark extract.

I also take Transfer Factors+ every day to keep my immune system working at the top levels.

Mark Nankivell

ASTHMA, WELL-BEING & ENERGY

I was feeling tired & stressed at the age of 27 & realised I had to attend to my health quick smart if I was going to live till I was a healthy 80 years old.

I was finding it hard to manage my asthma, always feeling tired & generally feeling life was a drag & an effort.

I started taking Transfer Factor +, 1 capsule, 3 times a day.

Within a week I felt more focused & energized.

These feelings caused me to really test the product out, so I decided to cut my asthma medication in half. The results really surprised and excited me! I am no longer dependant on my asthma preventers nor my Ventolin at all.

I feel so rejuvenated & have a lot more energy.

Melissa Sulis

ASTHMA & INFECTIONS

I have a history of asthma, bronchitis, fevers, aches and pains from viral and bacterial infections.

For as long as I can remember, I have been getting infections for which I would need treatment - usually in the form of antibiotics. But then I would have to go back to the doctor to receive treatment for my reaction to the antibiotics. It just seemed to be a never-ending cycle of infections and reactions - as well as the expensive doctor visits and prescription bills of course.

I have been taking 2 Transfer Factors per day for 6 months and in this time I haven't been to the doctor once! Usually I would be at the surgery every 3 to 4 weeks.

I have also ceased taking all of my asthma drugs including my inhaler.

If I feel a cold or virus coming on I just double my intake of Transfer Factors to 4 a day, and within 24 hours, all signs of sickness are gone. It is a huge relief for me not to be on antibiotics all the time, and that finally I have some resistance to all the bacteria and viruses that have effected me for so long.

I feel so strongly about what has happened to me that my next goal is to make sure all Natural Health Professionals know about Transfer Factors. I want everybody to know how great this product really is.

Sue Keate

BELL'S PALSY

On Labour weekend 2002 I developed a droopy mouth on one side and my right eye would close at a different time to my left eye. I couldn't drink anything without some dribbling down one side of my mouth. I felt truly miserable!

I had had an operation three weeks previously to remove my gallbladder. This did not go as smoothly as we had wished. Also for some time I had been experiencing chronic back pain and 'pins and needles' down both legs. As you can imagine I was very depressed.

The doctor was concerned when he saw my face and sent me for a CAT scan the next day. He said he was reluctant to prescribe anything that might disguise any symptoms until they were sure what was wrong with me.

The result of the CAT scan was that I did not have a tumor and I did not have a stroke so the conclusion was that I had Bell's Palsy.

The good news I was told was that it would get better, and the bad news was that it usually took several months to a year in many cases before being free from the facial distortions.

Once home I immediately began trebling and more my Transfer Factors and Pycnogenol Maritime Pine Bark extract.

In less than three weeks I had lost all the signs of the Bell's Palsy!

My doctor was amazed and wanted to know all about Transfer Factors - as did my Osteopath who was treating me for my back and legs. They had never seen such a rapid recovery from Bell's Palsy.

I am free from pain and feeling great! I can't say enough about Transfer Factors, Pycnogenol Maritime Pine Bark extract and other products I take. I shall continue to take maintenance doses.

Jan Du Flou

BLISTERS

Our daughter came home one weekend with huge ugly sore-looking blisters on both her heels. How this happened? We won't even go there!!

She was in a lot of pain and could barely walk.

I took one look and grabbed a Gel with Transfer Factors in it.

I applied it liberally that first evening and put a dressing over them. The next day after showering I noticed an improvement and re-applied the Gel to both heels and covered them again. By the third application the skin had re-generated and they looked a lot better. Our daughter was walking normal. Her workmates could not believe the swiftness of the healing.

As you can gather we use Gel in our household for any cuts, abrasions, and sunburn.

Walter & Pauline Tangohau

BREATHING / RESPIRATORY

My partner has had sinus and respiratory problems all of his life.

It has been so bad that he has had operations on his nose in an attempt to overcome his blocked nasal passages and ease his breathing. It is particularly serious at night when he has to breathe through his mouth because his nose is always clogged.

The problem becomes more difficult at various times of the year when he is more affected by pollen and his allergies.

I introduced him to Transfer Factors and he took 3 capsules per day.

Within a short time - even before he had finished his first 90 capsule bottle - he found that he was waking in the morning with clear nasal passages. At this time of the year, he would also normally be battling with a continually dripping nose. This is not happening either.

For the first time in as long as he can remember, his nose is clear - not dripping - and he can breathe through his nose at night. He is sleeping more restfully at night (aren't we both!) and this is making a huge difference to the quality of his (and my) life.

He has also noticed an improvement in his general wellbeing - *and* his arthritis has improved. We are still working on this and expect even more improvements as time goes on. Watch this space!

Debbie Baker

BRUISING

My hands had been bruising with the slightest touch. I understood it to be what happened as we got older.

Fifteen months ago I started taking Pycnogenol Maritime Pine Bark extract.

My hands are now free of bruises and the skin is so much stronger and no longer paper-thin.

I also take Transfer Factors and feel that I have maximized my protection against cancer.

Patricia Littlewood

CARPAL TUNNEL SYNDROME

In June 2002 I was placed on the waiting list at the Queen Elizabeth Hospital for Carpal Tunnel Syndrome (CTS) operations to both hands/wrists.

In October 2002 I began a programme of taking Transfer Factors and Pycnogenol Maritime Pine Bark extract. I started by taking 6 each of Transfer Factors and Pycnogenol Maritime Pine Bark extract per day for 2 weeks, then 4 per day of each for 2 weeks, then onto a maintenance dose of 2 each per day.

Within the first 2 weeks the pain, swelling and redness in my hands began to subside, and today I am happy to say that the symptoms have all but disappeared.

My surgeon was surprised when I went for a pre-admission appointment in December 2002. I told him I did not want the operation and he asked me why. I told him that I had been taking some natural products for the past 6 weeks that have reduced the swelling, and that I was not experiencing the sharp shooting pains up my arms any more. His look was enough to tell me he was skeptical (I guess he probably thought I was scared of the operation as well). But he was generous enough to say that if they were doing some good for me keep to taking them, and that if I had problems in the future to come back.

It is now February 2003 and I am still pain free!

Pauline Tangohau

CHEST INFECTIONS & COLIC

My 2-year-old boy has been ill since birth - suffering from colic, asthma and reoccurring chest infections.

Every month I would take him to the doctors at least two times, and they would usually prescribe antibiotics in some form or another.

The infection would disappear but within 2 weeks it would return, and he would be coughing and wheezing all night. He always seemed to have a cough and flu.

A friend of mine told me about Kids Transfer Factors. It was easy to get him to take them because they tasted like lollies.

After 2 weeks of taking one every morning his flu finally cleared up and his coughing was less, so I decided to put him on straight Transfer Factors. I would empty a capsule into his bottle morning and night.

Within a week of doing this he was having peaceful sleeps with no coughing. He seems so much healthier now. He still gets the odd cough, but I know that if he didn't have Transfer Factors the cough would become a full-blown chest infection. He is now improving all the time and I'm very thankful to those who make the Transfer Factors available.

Frances Jones

CHOLESTEROL REDUCTION

I had an angioplasty for severe angina (heart disease) 8 years ago. My Doctor remained concerned for my health and continued to monitor closely my blood pressure and cholesterol. I remained on a strict Heart Foundation diet.

The Doctor became concerned when a routine test showed that my cholesterol had suddenly climbed to 6.9. He urged me to reduce it down as quickly as possible.

It was at that time that Transfer Factors+ became available in New Zealand. I started taking 2 Transfer Factors+ capsules per day along with Pycnogenol Maritime Pine Bark extract.

I went for a routine check 3 months later. After checking my heart, blood pressure and pulse the Doctor sat back amazed. "What have you been doing? There is such a total change. You check out like a 25 year old! Whatever you are doing, keep on doing it!" (I was 63 at the time).

His amazement was complete when my cholesterol test came back. 3.5!

Needless to say, I am continuing on with both Transfer Factors+ and Pycnogenol Maritime Pine Bark extract.

I have never felt so good and had so much energy for many years.

George Littlewood.

CIRCULATION & GENERAL WELLNESS

I am a healthy sporty person, but I used to always really feel the cold and have cold hands and feet.

Last autumn I started taking Transfer Factors+ and Pycnogenol Maritime Pine Bark extract, one capsule of each, twice a day.

Within weeks, I noticed that my hands and feet weren't as cold as they normally were. And after a few months I realised that I wasn't feeling the cold as much either.

During last winter my partner John came down with a severe flu and was house bound for a week.

As a preventive I increased my dose of Transfer Factors+ from 2 capsules a day to 4 capsules a day for a few days. I was very impressed as I did not contract

any flu symptoms at all and I was able to carry on my usual activities, including playing outdoor tennis throughout the winter.

Needless to say that John is now also taking both Transfer Factors+ and Pycnogenol Maritime Pine Bark extract.

We are both now enjoying the benefits of having boosted our immune systems. The odd time we do feel the start of a sore throat, we just double our dose for a day or two and then the symptoms just disappear!

I just feel great, I have more energy and even my tennis has improved.

Desiree de Leeuw

CIRCULATION & NUMBNESS

I have had circulation problems for many years, and I thought it was something I had to live with.

My hands and feet were always very cold, and at times I would experience numbness even in my face.

A good friend of mine introduced me to Pycnogenol Maritime Pine Bark extract capsules. I only took 2 per day and within 2 weeks my symptoms were almost non-existent. After the third week the numbness was completely gone and I could feel warmth in my hands and feet.

My circulation problems are now a thing of the past!

Rebecca Turner

COLDS

When I got a cold, it would usually stay with me – sometimes for months. I would think it was starting to clear up, and then it would come back again just as bad as before. As we get older, I think it is more difficult to shake these things off.

I was introduced to Transfer Factors+ and started on a maintenance dose of 2 capsules per day.

I can honestly say that it has made a huge difference to me.

Now when I get a cold or viral infection, I triple my dose and the whole thing is over in about a week. And it doesn't come back again either. It is all cleared up and I am back to normal.

Transfer Factors are great for keeping you healthy.

Eva Blake

COLDS

I have had a few instances over the last couple of months where I've had a sore throat and felt like I was starting to come down with a cold.

I start to dose up and take 6 Transfer Factor+ morning lunch & evening as well as using the Throat Spray every couple of hours until I no longer have any symptoms.

I have thrown off an oncoming cold recently in 24 hours and didn't even feel sick! Nothing else seems to work like this!

Even my at first sceptical husband has been totally amazed by the results he is getting too.

Arlene Rayner

COUGHS, COLDS, FEVER, EARACHE.

For the six months from March to August 2000, our now fifteen-month-old son has had a long run of sicknesses: - earaches; fevers; coughs; colds; tummy upsets and eczema.

In early September, I consulted my Naturopath about him. She modified his diet and gave him Transfer Factors, 3 capsules per day.

In just over two weeks, his constantly running nose has stopped, his cough has cleared, and he is at last completely well.

As a preventative, we are keeping him on 1 Transfer Factors capsule a day.

R Walsh

CROHN'S DISEASE

I was diagnosed with Crohn's disease in 1991. Throughout the past several years I have suffered from constant pain in my abdomen along with irritability and other symptoms of Crohn's disease. Crohn's disease is an inflammatory bowel disease and also causes malnutrition. Along with the Crohn's, I was diagnosed with Epstein Barr virus also known as chronic fatigue Syndrome. I had to take several naps during the day just to be able to regain my energy to perform little tasks. After reviewing various medical articles on Crohn's Disease, I chose to take an alternative approach to treatment.

Over the years I have tried many forms of therapy and supplements to help treat my condition. I even went to a hospital in Tijuana, Mexico to try some new alternative treatments and protocols. The most relief that I would have would last for a few weeks. I'm 6'2" tall and my weight was down to 163 lb. As time went by I was beginning to just accept the fact that I had to live with my condition and that there might never be any long-term treatment for Crohn's Disease.

In September of 1998 I learned about Transfer Factors. After taking Transfer Factors for a month I started to notice that I was sleeping through the night without any pain or irritability. Then I noticed that I could eat foods that I had stayed away from due to the pain they would cause in my abdomen. My energy level was increasing and lasting longer throughout the day and I wouldn't have to take naps.

It has now been over 22 months since I started on Transfer Factors along with Essential Fatty Acids. I currently use the Transfer Factors+ product since it was introduced in June 1999. I have had absolutely no symptoms of the Crohn's disease since I began using

these products. My weight is now 195 lb. and I feel great. The best part is I now enjoy eating healthy foods that I couldn't eat before.

I encourage anybody with a condition like mine - or anybody that has an interest in maintaining good health - to get on this program and give it at least six months. I can assure you that you will feel better and you will be blessed with the benefits of good health.

Dave Daughtrey

CHRONIC FATIGUE

3 years ago I started feeling my energy and health going down hill rapidly.

I was getting colds – flu's – allergies –pains in my hands when windsurfing-my energy was decreasing week by week.

For the past 2 years I have had to give up coating roofs (my JOB), and also my favourite addiction, windsurfing.

I had been to about 9 doctors over a 3-year period in the hope that they could help me. Each of these doctors told me the same thing. They said I was sick!! I knew I was sick for goodness sake!

I was prepared to take every test possible money – money was no object - I wanted to get better.

Doctor after doctor. By then I was getting pretty frustrated.

The last doctor told me I had hypoglycemia- a very bad heart coupled with high blood pressure. And allergies that would never go away. He said that I shouldn't exercise to the extent that I would break into a sweat, as in his opinion I would probably have a heart attack.

Well I have always been energetic and this news blew me away.

Needless to say I was in a bad way with all this mentally.

In April a good friend of mine told me about his mother-in-law who was a Naturopath. I went to see her.

She gave me the total going over - fifty times more detailed than any doctor had ever done. She looked at my blood under the microscope and showed how my blood cells were all squashed totally out of shape.

She started me on Transfer Factors+ at 3 capsules per day - and a cheap multivitamin I found at the Warehouse!

3 weeks later I felt a sudden change in myself – my energy was up – I felt better than I had for 3 years!

I felt so good, I started working out on my rower 30 minutes a day. A week later I added swimming 50 laps per day in the local pool.

After 2 months of doing my workouts I was feeling so good! I could now swim 80 laps of the pool or 2 km non-stop, and 30 minutes on my rower each day.

My pulse was down to 55 and my blood pressure down to 140 from 180.

And now I can windsurf again!!!

I still have a slight allergy on my hands, but apart from that my asthma has cleared 95% and my sinus problems have gone too. I also used to get cold sores every month but have had none for 9 months since taking Transfer Factors every day.

Life is suddenly very cool!!

John Holland

CROUP

My two girls aged 2 and 3 both developed croup at the same time last year. They both coughed almost continuously and at nights often woke up finding breathing difficult.

This went on for about 3 months with no improvement and eventually my 3-year-old developed a chest infection and my 2-year-old got pneumonia.

Both had a course of antibiotics that helped but didn't clear it up.

I started them on 4 Transfer Factors+ capsules per day and after only 4 days you could hardly tell they had been sick at all. They were running around playing happier than they had been in ages with only a mild cough that lasted only about a week longer.

I kept both girls on 4 Transfer Factors+ capsules per day for 7 days then 2 capsules for another 7 days.

They now get 2-3 capsules a week for maintenance.

I have been amazed at the difference it has made – particularly to my 2-year-old who not only used to catch every bug going – but also always seemed to get it twice.

Now she rarely gets anything more than a runny nose that disappears quickly.

Julie Maddox

DEMENTIA

One of my friends' 89 year old dad had a fall prior to Christmas.

He was hospitalised and came out diagnosed 5th level dementia, the highest level there is.

Since Christmas he has been taking 8 capsules of Transfer Factors+ per day.

He's a bit 'bloody minded' and won't take anything, so he's getting it via butter on sandwiches, dinner, deserts - you name it!

He has just been re-diagnosed at level 1 dementia and the doctors don't know why.

My friend's remark? "I've got my dad back!"

Kind regards,

Bill Perrins

DERMATITIS

Shirley, my mother-in-law, has suffered from dermatitis on her legs for many years. It would get so bad at times that she would continually scratch her legs causing them to bleed and then her legs would become infected.

We have taken her to numerous skin specialists, who have all prescribed her medications, which would clear up the problem temporarily, but as soon as she had finished the course of medication, the dermatitis would return, restarting the whole cycle of itching, bleeding and infections once again.

I started her on Transfer Factor and Choice 50 in March and by the end of April we were all absolutely totally amazed at the results. No more itchiness, therefore no more bleeding and infections. The dermatitis has just about vanished!!!

After many very uncomfortable years Transfer Factor has made such a huge difference in her life.

Carol Davies

EAR INFECTIONS, COUGHING & DERMITIS

I am a recovering alcoholic who hasn't had a drink for 3 years and stopped smoking 6 months ago.

I have numerous health issues, one of them being very susceptible to bronchitis and I cough a lot and am very short of breath. I needed my Flixotide in the morning to get going.

I started taking Transfer Factor 2 months ago and within a week I noticed that I had stopped coughing during the night and that was a bonus for my wife as well. Undisturbed sleep!

I also have Sleep Apnoea and sleep on a Cpap machine at night but am very sluggish in the morning and it is hard to get up. Not any more!!!

I now get up early full of energy! I haven't used my Flixotide for weeks.

My wife commented that my eyes were looking brighter and they are losing their yellow and blood shot look. Even my skin is looking better

An ear infection (due to the moisture behind my hearing aid and a perforated ear drum) was causing me a lot of pain, so I had 2 Transfer Factors in the morning 2 at lunch time and 2 at bed time by which time the pain subsided. I did the same again the next day and by that evening it was all cleared up.

My dermatitis has nearly all gone as well.

My wife says my attitude is much better to!!!

All this has happened taking just 2 Transfer Factors a day. So amazing

Bill Gray

ECZEMA (ATOPIC)

My daughter is 15 years old and has suffered from Atopic Eczema since birth. This condition presented itself with weeping and broken skin all over her body - ears, eyes, nose, mouth and all sensitive areas.

Standard medication failed to reverse the problem, and I tried a variety of Chinese herbal remedies and other treatments without success.

In March of 2002, when she was 14 years old, I was introduced to Transfer Factors and she took 8 capsules per day. Within 12 weeks her teacher was commenting on her skin improvement and for the first time ever, she was able to attend school summer camp. She continues to improve.

Shirley Lai

ECZEMA

My 8-year-old son Julian suffers from eczema. It got so bad last winter that he had open wounds on his thighs – it was also affecting his appetite. His stress levels escalated and across his shoulders and down his spine he had what looked like acne with whiteheads that looked very angry and red.

We used all manners of creams and lotions and bath preparations.

Hoping to alleviate some of his stress and to boost his immune system, I started to give him Transfer Factors - 1 capsule 3 times daily.

I noticed the following day he was less agitated and within a few days his appetite had returned.

I continued with the Transfer Factors and also applied a Transfer Factors Gel.

Over a 3-day period the spots faded and then disappeared.

The Transfer factors and Gel have been fantastic. We no longer have to put up with gummy creams and constant reminders for him to stop scratching. Julian finds the capsules easy to take and the gel soothes on contact.

A big thanks from a happy mother.

Lillian Karaka

ENERGY WHILE PREGNANT

Within 3-4 days of taking Transfer Factors+ for the first time, I felt an increase of energy.

I woke up feeling ready to start the day, and at about 3.30pm when I had been previously ready for a snooze on the couch, I found I was still happy to keep going.

I am currently 7 months pregnant and have settled into a routine of 1 Transfer Factors capsule a day. I am convinced that I would be doing a lot more snoozing if I were not taking Transfer Factors.

Bev Spraggs

ENERGY & WELL-BEING

I took Transfer Factors+, 6 per day over ten days because, although I had no specific illness, I had been dragging my feet and feeling generally unwell for a few weeks.

Not only did my energy and well being return, but I became aware to my delight that the skin on my face had become clear and smooth. That has a wonderful bonus.

J Humphreys

ENERGY

I was overweight and fatigued.

I started taking Transfer Factor and three days later my 8 year old granddaughter asked me why I was walking so fast? I told her that I have more energy!

Joe McKenzie Jnr

FIBROMYALGIA

I was in my late 30's when a rheumatologist diagnosed me as having Fibromyalgia. I could no longer hold down a full time job and part time jobs with great difficulty. I felt old and really had a bleak outlook for my future.

Fibro is diagnosed when you have constant pain for at least three months in main parts of the body. The other significant way to distinguish Fibro is when at least 11 out of 18 points of the body are very tender. I scored very high at 16.

Chronic Pain was a fact of life for me and I thought everyone had some sort of pain continuously. I was always tired, had very low energy, had had several sinus operations, and was constantly on antibiotics.

I was astounded when my specialist told me that I would have to live with it for the rest of my life because there was no cure and they really did not know what caused it. He said that exercise was good in that it would help me cope with the everyday stiffness and swelling. Like I could exercise - some days I could barely move!

Fibro presents a range of other problems and they seem to be different for everybody. I suffered devastating migraines for 3 to 4 days at a time. I also have irritable bowel syndrome.

But the worst pain for me was in my face - so constant that I could not eat and had to resort to painkillers. I also had sinus infections constantly.

Then miraculously I was introduced to Dr Robertson's Fibromyalgia Program! This protocol includes Transfer Factors, Pycnogenol along with other arthritic muscle and joint products.

For years I have never slept more than 54 minutes before waking with pain of some sort.

Well, on the first night after I started on the protocol, I slept for more than two hours straight. By weeks end my sinuses were totally drained and I no longer woke up with a stuffy head and a headache. My facial pain by the end of that first week was gone and I had energy. My body pain was minimal and I was sleeping over 4 hours straight every night.

A new me was emerging and I was beginning to glimpse a possible future - a future where I could live pain-free with an abundance of energy. Was this possible? Well, a month later I was still feeling great.

But then I made the mistake of running out of the products (I gave some to my Mom and son for the flu and they were back to normal in 24 hours!). My symptoms all returned and I went into migraine-state for four days.

When the products arrived I took them immediately and within 24 hours I was back to feeling like the NEW me. Now I order enough for all my family and I'm resting easy.

For me this has been life changing. Grateful thanks to everyone involved.

Heather Bannon

FIBROMYALGIA

For twenty years I suffered with Fibromyalgia.

I ached all over, had many sore joints, found it very hard to get moving in the morning, and always had sore legs by the end of the day.

In early August 2001 I began to take one Transfer Factors capsule and one Arthritis, Muscle & Joint daytime capsule before each meal every day.

By the end of August all my symptoms were gone!

I had no stiffness or soreness, and was moving normally again.

To think that I had put up with this problem for twenty years and then within one short month using these two great products I became completely free moving again, and as a bonus had much more energy.

Glennys Muir

FLU & COLDS

Normally over the winter period I have a cold or get the flu. It usually hangs on for eight to ten weeks.

This can be a miserable experience when I have to front up to work as a shearing contractor – no matter how severe the distress.

To try to boost my immune system, I started taking Transfer Factors+ at the dosage of two per day.

This winter for the first time I can ever remember, I have not had a cold or flu. Neither has my wife - nor has my eight-year-old son.

Thanks to Transfer Factors+ we have good health.

I cannot imagine a day now when I would not take my daily 'immune-system booster'.

Keith Wilson

GENERAL HEALTH & WELLBEING

Every parent with young children attending Playcentre, Daycare or Kindy knows how susceptible they are to catching every bug and illness going – and bringing them all home for everyone else to share!

Since the birth of my youngest daughter I had been constantly run down, tired and probably very grumpy. My children have consistently been poor sleepers and early risers. Therefore I too was really susceptible to catching all these viruses.

However since taking Transfer Factor +, I am no longer run down and I have lots of energy. I can only credit this to taking the Transfer Factors as no other aspect of my life has changed.

I have truly been impressed with the improvement in my health as a result of taking Transfer Factors.

My visits to the doctor are down 95% this year. This has saved me time and money, particularly as the doctor is a 60km round trip away.

All my family are now taking Transfer Factors and enjoying the benefits.

Clare Griffiths

GLANDULAR FEVER - CHRONIC

My 7-year-old daughter has been suffering from Chronic Glandular Fever for the past five months.

She has missed a lot of school and after school activities due to exhaustion and sickness.

I tried her on Transfer Factors and although at first I was very skeptical, I do believe that it has helped her enormously.

For the past few weeks since being on Transfer Factors, she has not missed any school and has managed to do all her after school activities as well.

Transfer Factors seem to have given her a lot more energy and a new lease of life.

Isla Titley

GOUT

My husband suffered a bad attack of Gout – only the 3rd he had ever had. Previously only pharmaceutical drugs seemed to sort it.

This time, we started him on Choice 50, and increased the Fibro Daytime he takes for his bad back and joints, and also of course increased the dose of Transfer Factor.

The Gout attack eased and went, and the continued use of Choice 50 seems to be keeping it at bay.

Bev Spraggs

KNEE & BACK PROBLEMS

My husband had a long suffering hereditary problem whereby his knee was always sore, and would 'lock up' if he drove 2 hours, sometimes less.

This, combined with a bad back due to about 15 years of driving long distances to get to work, gave him pain for many years.

We started him on Transfer Factor, which eased both problems some, then a few months later started him on Fibro Daytime.

The combination of the 2 products ensures he now has very little back and knee pain, and he can now drive for hours without his knee locking.

Needless to say – he recommends both Transfer Factor and Fibro Daytime to anyone with back and/or joint problems.

Bev Spraggs

HEART CHECK

Heart disease is the biggest killer of men and women in the Western world, and for many years I have been concerned that all the indicators existed for me to take my place in the early-death statistics.

The reasons for that are...

- My Father died of a massive heart attack when he was just 68.
- My Mother has angina.
- I smoked for ten years or so when I was younger.
- My cholesterol is genetically high at 6.3 and there is *no way* I can get it down.

My doctor said that if I wanted to live a long life (I am 53), I should immediately start on a cholesterol-lowering drug – and that I would probably be on that forever. He said the risks factors in my history were too high to ignore, and that the plaque building up in the arteries in my heart caused by this high cholesterol would kill me.

I read about a new-technology CAT scan test called Heart Check offered by the Ascot Hospital in Auckland, New Zealand. It analyses and determines the plaque levels in the arteries of the heart.

I had this test and here are the results.

The scale goes from 0 - 400.

Zero means you have the plaque of a new-born baby. 400 means your arteries are virtually clogged shut – don't get up, you won't make it to the door!

1-10 means minimal identifiable plaque – low risk – unlikely candidate for coronary disease or occurrence.

My reading was 3.9!

The nurse and radiologist were amazed and asked me how I had done that.

Here's what I told them...

For the past six years I have taken Pycnogenol Maritime Pine bark antioxidant called Choice Prime.

In Europe it is known as the atherosclerosis antidote. It fights the build-up of plaque on the artery walls through its free-radical fighting antioxidant qualities. It strengthens the arteries, veins and capillary walls. It is a most powerful ally for the entire vascular system.

It also strengthens the collagen that holds all our cells together – the by-product effect of that being we look younger too!

I take 2 small capsules of Choice Prime every day without fail. Choice Prime is the most powerful formulation of Pycnogenol ever developed. That is why I take this brand because – as I hoped you have guessed - I try not to take chances when it comes to my own health.

The nurse and the radiologist were extremely interested in knowing more about this product so they could advise others who needed the protection too.

I know that taking Choice Prime has given me a great chance of beating my most likely killer – and for less than a couple of dollars a day!

If anyone would like to see the examination results, I would be most happy to forward them on.

I now also take TF Cardio to give myself the ultimate protection against heard disease.

And I also take Transfer Factor Plus every day to give myself the best possible fighting chance against the disease that killed three out of my four Grandparents – the current number two killer – cancer.

Barry Blake

HERPES, ECZEMA, ASTHMA

I am writing to let you know the affect Transfer Factors+ has had on my nine-year-old son Dean.

He has been an asthmatic since birth, and also suffers skin problems (eczema), as it is usually associated with it. When he was approximately 5yrs old, he contracted the Herpes virus and suffered terrible cold sores, which would take forever to clear up. He was slow to heal and the skin that wasn't affected by eczema was dry and felt like sandpaper. His fingers would crack at the tips, and any cuts he got would turn into those terrible flesh eating type sores that would make his life a misery.

I was introduced to Transfer Factors+ by my friend about three months ago. I had rung to tell her I was desperate about Dean's health and felt my only resolution to his latest bout was to visit the doctor once again to get antibiotics to clear up the horrible cold sores. He had two sores, one on his top lip, one on his bottom lip on the opposite side, and a small sore on the top of his nose and two up on his forehead - you can imagine what he looked like?

I used the Transfer Factors+ at 4 capsules per day, and was astonished at the change, especially the

change of the look of them while they were healing. After just three days of taking the Transfer Factors+, there was a major difference in the two on his lips, and the whole lot were gone within 10 days. Gone with no sign of them ever having been there.

They healed from the inside out. I did not have to use any topical cream on the outside, and didn't cover them except at night. As they healed, the top did not form an ugly "crust"; the skin remained moist but not wet. This has never happened with the antibiotics. Yes, they would have eventually healed, but through experience, I know they would have been much slower to heal, they would have formed ugly "crusts", and cracked and bleed just through using his mouth. I continued to use the Transfer Factors for another three weeks during which time I noticed a huge difference to the rest of his skin. It was usually dry, itchy and old feeling, but it became youthful again, had some real moisture and softness to it - something I have never felt before on him. I am now using Transfer Factors Gel on his skin to help as well.

On Wednesday morning he woke with two cold sores in their usual place on his lips. There had been no sign the night before. I immediately increased the dosage of Transfer Factors+ to 8-9 capsules, and feel a bit silly saying this, but it was as if they healed before my eyes. By that evening they had shrunk in size, not spread as was usual and not infected either. They didn't have that angry red look about them and appeared to be only on the surface of his skin - not deep into his flesh. By Thursday morning they were smaller again and today the top one is nearly gone and the bottom one is not far behind. I have no doubt in my mind that they will be gone by Saturday/Sunday.

I can see now that the Transfer Factors+ is helping Dean's body build up resistance, and that he is winning the battle to rid himself of them once and for all. It is certainly helping his asthma too.

I just want to say thank you for Transfer Factors+. Finally we have something that really works.

Anita Hyde

INFLUENZA PROTECTION

Everyone who knows me, knows I don't have a very strong immune system. My son would come home from school with the sniffles & within 24 hours I'd find myself in bed for at least 4 - 5 days with the flu.

I was sick of people commenting "you've got the flu, again - you only had it a month ago!"

I decided to give Transfer Factor + a try, and Wow, within a week, I noticed a complete change.

I felt much more focused & energized whereas before, I would go for an afternoon nap at around 1pm - 2pm every afternoon. The real tester came 4 weeks after being on TF+, when I began to get a runny nose, sneezing & a husky cough. I thought "oh no, here we go again".

But within 48 hours the flu symptoms had disappeared & I felt right again. The flu did not put me to bed, nor

did it carry on for a week. I had energy & completed my daily routines of being a Mum.

I take my maintenance dosage of 1 capsule 3 times a day, until I come into contact with someone who has the flu & then I double it for a couple of days to give my immune system an extra boost and myself extra protection.

Never before have I had the flu & not gone to bed

Tanya Anthony

INFLUENZA

I came home from work one Friday in September 2000 with an extremely sore throat, bad headache, fever, nasal congestion, and a body that felt like it had been beaten about by a cricket bat!

I took 3 Transfer Factors+ capsules and went to bed.

I have a friend who had had the same symptoms and was off work for three weeks with this particular flu bug. I felt very ill over the weekend, stayed in bed, drank plenty of fluid, and took two Transfer Factors+ five times during both days.

On Monday I felt considerably better and continued the same dose. By Tuesday I felt almost normal and was able to return to work. By Wednesday I was my usual energetic self again.

As far as I'm concerned, this remedy beats being sick for weeks, or taking antibiotics and having upset bowels as a result.

I was very happy with the way Transfer Factors+ boosted my immune system to overcome this infection relatively quickly.

H Wells

INFLUENZA

In late May 2001 I went down with a bout of the viral flu.

I immediately started taking Transfer Factors+.

Normally within a few days I would have to go to the doctor for antibiotics as most infections usually go to my chest.

Back in February 2001 after returning from a six week holiday I was diagnosed with pneumonia in the right lung and really expected this new bout of flu would cause the same problem.

However on this occasion I did not have to visit the doctor and attribute this to Transfer Factors.

An added bonus was that the arthritis in my fingers, especially the index finger on my right hand, which continually got caught in door handles and was very red and swollen, has reduced in size and there has been no more pain.

I am certainly very grateful to the person who introduced me to this amazing natural product.

Athalie Roberts

LEPTOSCLEROSIS

Transfer Factor+ has helped my partner's Lepto and general well being, well beyond what I thought was ever possible.

He was a bit skeptical at the start but now he loves them. The other night he had two rum and cokes and didn't show a reaction to it. He would normally go red in the face), and that made it hard for him to have a social drink with his colleagues.

His breathing and nasal congestion have cleared up, and even his voice has cleared up.

All his symptoms of the Leptosclerosis have disappeared.

My partner says its marvelous stuff.

Mirina Francis

LUPUS (SLE)

I was diagnosed with Lupus one year after the birth of my second child. I was 33 years old and I considered myself to be fit and healthy.

I used many pharmaceutical creams and arthritis and anti-inflammatory drugs to ease the exhausting pain of feeling every aching bone in my body and being unable to lift the weight of my own head!

I had tried to clear my busy schedule in order to live a semi-normal life. I began to drive my car less often, go out less often and was taking afternoon naps while my baby slept.

I had to do this in order to take care of simple, normal duties in our household. (Cooking, bed making etc). A far cry from the full on super-woman style life I had been living.

Six months after my diagnosis I met someone who introduced me to Transfer Factors.

I started on (and still take) 3 capsules per day.

After the first couple of days, I began to feel less aches and pains. I lost the intense ache in my wrists and ankles. After a few weeks I realised I was beginning to live my life without thinking, "Oh, I can't do this or that."

I no longer sleep every day, the depression of living my life in pain has disappeared, and my eyes have got back that spark of vitality that I truly felt I had lost forever.

If I miss taking my capsules for even one day, the symptoms return – but it's great to know that it is a 100% natural product that's doing it for me – like eating a special food or something.

If I feel a little low due to a cold coming along or I have simply 'done too much' I double my daily dose for a day or two.

I feel my family and I were blessed the day I found Transfer Factors.

This combined with a regular yoga practice and my life is returning to normal.

When people ask me how can I possibly look so good... I tell them I am taking some very special MAGIC PILLS!!!

Delyse Rivers

LUPUS (DLE)

Lupus is an autoimmune disease whereby antibodies attack the body instead of the virus. The two types of Lupus that have been identified are Systemic Lupus Erythematosus (SLE) and Discoid Lupus Erythematosus (DLE).

SLE affects many areas and can range from mildly uncomfortable to near fatal. DLE is the less serious of the two, presented mainly as a skin rash.

It is this latter form (DLE) that I have been diagnosed with.

I am a fit and healthy woman and lead a very busy and sometimes hectic life. The only time my Lupus really becomes noticeable is when I am under extra stress.

I experienced the symptoms on my face, with a dry, red, scaly and sometimes unsightly scaly rash. When it really 'flared', it was very sore and tended to have a burning sensation.

My specialist had told me that topical steroid creams and the occasional steroid injection were the best I could hope for.

I was thrilled to learn that there was an all-natural product that I could take for LE, as it is commonly known.

I currently take 4 Transfer Factors and 2 Essential Fatty Acid capsules daily.

If I miss my daily dose of Transfer Factors, my face begins to 'flare up'. When this happens I increase my dosage of TF to 5 over 2-3 days and the symptoms subside.

It is great knowing that this all-natural product is helping keep my LE at bay and that I am also being safeguarded against any other infections as well.

My family are also taking Transfer Factors+ for their general well being and they, like myself, are amazed at the results this product produces.

It is my strong belief that everyone would benefit from taking Transfer Factors, as it really is a truly remarkable gift derived from Mother Nature.

Denise Dowman

MENOPAUSE

I recently had the "joy" of experiencing the full onset of Menopause. Any woman reading this who is either in, or has been in Menopause, will know what I am talking about and what this means.

I have always been against HRT, and recent findings on the life-threatening dangers of taking something derived from pregnant mare's urine, have confirmed that my stance on this was sound.

After a few weeks of putting up with continual hot flushes that came on anytime, anywhere – and a total lack of energy, I started investigating the natural products area to see if there was anything with a proven record.

After reading the 'Genistein' book by Rita Elkins, I decided to give BioGenistein Plus a trial.

Taking just 1 capsule a day, the results were virtually instantaneous I have not had a single hot flush since the first day on that dosage, and all other symptoms have reversed themselves as well.

I'm amazed at how quickly this product worked for me, and I'm pleased to say that I am now completely symptom free.

Sue Blake

MENOPAUSE

I started taking BioGenistein Plus because of the symptoms I was experiencing as I progressed through Menopause.

I had been taking a herbal supplement from the supermarket that did ease my symptoms but the very real and unpleasant hot flushes, heart palpitations and irritability were still with me.

I was amazed that from the time I first started taking BioGenistein + I have not experienced **any** heart palpitations, hot flushes have disappeared (even after a glass of wine) and my normal disposition is once again restored. It has certainly made life much more enjoyable at what can be a difficult time for women of my age.

Alison McLaren

MOLES DISAPPEARED

I used to have several dark-brown moles on my back, face and stomach, with a couple of brown skin tags on my neck too.

After just a couple of weeks of taking my Transfer Factor, I was just washing my face when I looked in the mirror and noticed that the brown mole on my face wasn't there any more!

While I was trying to figure what had happened, I noticed that the skin tags on my neck had almost disappeared and were no longer brown.

I then discovered that every brown mole that I had was no longer brown. Many had disappeared and the remaining ones had shrunk to half their original size or were even smaller.

Michael Witherington

MOLLUSCUM CONTAGIOSUM

I recently had occasion to test out the capabilities of Transfer Factors on myself, something that does not happen often.

For about a month, I was bugged by an unusual rash on the torso – back and front – and upper arms and legs. Not really threatening, but it was itchy to the point of real annoyance when I was showering, or in bed.

I hit my books in order to find what I had, and soon realised what I had was molluscum contagiosum. Apparently this could go on for a year or more.

No way I decided. Let's see if Transfer Factors can deal to this virus.

Well it sure did the trick!

12 days at the rate of 6 capsules per day and no more rash. No itching. Fixed!

As a homeopath, I find Transfer Factors and other products in the range to be extremely valuable additions to my use and prescriptions of homeopathic remedies.

Brendan Gates, Dip.Hom

MORNING SICKNESS & ENERGY WHILE PREGNANT

For the first 7 months of my pregnancy I suffered from terrible morning sickness.

I could not hold anything down till after lunch and had very low energy levels. I napped frequently throughout the day.

I started taking 2 Transfer Factors capsules every morning.

Within only 3 days I was feeling great! My energy increased, and I wasn't feeling so nauseous.

After 2 weeks my morning sickness completely disappeared. I just wish I knew about this marvellous product earlier on in my pregnancy.

Some pregnant friends of mine are also taking the Transfer Factors and they too are feeling better than ever.

And now that I am breast feeding, I know my milk is EXTRA rich in transfer factors - so my newborn is getting a REALLY good start in life.

Lisa Rae

MULTIPLE SCLEROSIS

I was diagnosed with Bells Palsy at 16, which turned out to be my first encounter with MS which got worse as time went on. Two years ago I had a whiplash. A bone scan found a new lesion in my spinal cord between the base of the skull and my neck and lesions in my brain and lower brain stem, which explained a lot of the strange illnesses over the years.

I could not do much except walk from the bed to the couch and with great difficulty cook a meal. I was so weak and shaky having no balance, dizzy and feeling sick all the time. I lost weight from being 8 1/2 stone to just below 7 stone. I could not use a can opener, pick up the cat or stand in the shower. Getting dressed was a real effort.

I was given a brochure about Transfer Factor, but could not see how it could help me until 6 months later in sheer desperation I read the brochure again. I got quite excited about it. I couldn't get any worse than I was at that time so I had nothing to lose by trying the product.

I started taking one capsule a day gradually working up to three a day. I felt awful if not a little worse, but having made the commitment to myself to do the three months trial I persevered.

Two weeks later I started to feel a little better and I was wondering if it was working. Just as I finished the bottle of capsules I found I could stand in the shower which I could not do before.

The second month of the trial I found I no longer needed help with my shopping and was able to do it alone.

One day while shopping at the supermarket I had to leave everything and go home. I was shaky, dizzy, and felt really sick, just as I had been as in the old days. When I got home I realised I had forgotten to take my Transfer Factor.

After eight months of taking Transfer Factor I am excited because I can now do the things that I used to do before my illness.

Over the months of taking Transfer Factor the tingling in my hands and feet has abated and the burning down the right side of my body has decreased considerably.

My balance has been restored as I can not only take a shower but stand on one leg and shave my legs. It is so good to be able to do the housework without wanting to "throw up". I can also go for a walk of at least 30 minutes something I have not been able to do for a very long time.

Three months ago I kept an appointment made seven months previously with a neurologist. He had read my doctor's notes prior to seeing me.

I will never forget the look of astonishment on his face. Here I was an able bodied person who had walked to the surgery. He said he had nothing further to offer me from the medical world. I was too well and I am still getting better.

As an advert for a well-known shampoo says, "It won't happen overnight, but it will happen". I know it has worked for me and I'm grateful.

Aileen Chapman

NAPPY RASH (severe)

Not so long ago my 18month old daughter developed the worse case of nappy rash I had ever seen. Initially

I was reluctant to go to my Doctors because it was a 60km round trip - I knew it was nappy rash and it seemed pointless.

Therefore I tried all the remedies I could get my hands on –all had no effect. So off to the doctors we went. He prescribed a steroidal cream and gave me a family supply of barrier cream. These were dutifully applied as directed for the next 3 days and only a minimal improvement was noticed.

It was then my husband had an inspiration to try Transfer Factor Gel and we applied it every time I changed her nappy for the next 3 days.

The results amazed us all. Within 24 hours the red sores had started to heal over and Zoe was not in pain every time she went to the toilet. After 3 days the rash had completely disappeared.

My kids now call it "Mummy's Special cream" and any time someone suffers cuts, bruises, rashes, stings or sunburn - out comes the Transfer Factor Gel. **NO FAMILY SHOULD BE WITHOUT IT.**

Clare Griffiths

OOS (Occupational Overuse Syndrome)

For about 12 years I have had a sore shoulder as a result of a supermarket job in which I had a lot of repetitive work. Although not always sore, it would flare up when I did too much physical work, or if I became stressed.

Within a month or so of taking Transfer Factors I realized that the pain was not so bad, and would not last as long.

I have been taking Transfer Factors for 4 months, and now have absolutely no pain in my shoulder at all. I now take 1 Transfer Factors per day.

Bev Spraggs

OOS (Repetitive Strain Injury)

I have had OOS in my wrist for about 3 years now and have to wear a support when I do the vacuuming, gardening, cleaning windows etc. Otherwise the next day would see me with a lot of pain which would just not go away.

I had physio for a while and was given exercises to do which helped when I did them but exercises get forgotten about. Then I was introduced to Transfer Factor and Pycnogenol (Maritime Pine Bark Extract).

I had already been on another company's Pycnogenol for my arthritis which has been working very well for me for about 9 years, so I just swapped over taking the usual maintenance dose of 2 capsules a day of both Transfer Factor and Choice Prime and waited something to happen.

Well! I got more energy and felt absolutely the best I had for years, but still my wrist was bothering me.

Then I doubled up on both products and 4 days later lo and behold, no pain in my wrist and it was stronger as well.

One day I forgot to put my support on when I push hoed my flower garden, cleaned my windows and then vacuumed. But I didn't get any pain. Now that is the miracle that I have been waiting for.

These are 2 wonderful products which have restored my health to a level I didn't think possible.

I am very grateful to have been introduced to Transfer Factor and Choice Prime

Merylyn Gray

PAIN AFTER A FALL

A couple of years ago I fell from a horse and cracked a vertebra. After rest, physiotherapy, anti-inflammatories and countless pain relief tablets I still had pain.

Sometimes it was quite bad especially after I'd walked the dogs. My Mum gave me Transfer Factor to try. After only 24 hours I rang her and asked if they could work in that short space of time! Gradually the pain has subsided until now I'm pain free.

Must mention the awesome side effect it had, quite unexpected, but since I have been taking Transfer Factor my skin has improved 100%.

Cindy McLaren

PARKINSON'S DISEASE

Jon has had Parkinson's Disease for the last 10 years.

Ten days in to using a product with Transfer Factors, maitake and shiitake mushrooms, zinc, beta glucan, thymic factors, IP6 and cordyceps, he lost all of his shaking.

He could stand up straight, and had eliminated most of his pain.

The shaking came back 24 hours later, but it came back less. He was able to work for 8 hours a day, stand up straight, had very little pain - and at times, the shaking is not there at all. He was at least 40% improved at that point. This improvement came within 2 months, which was pretty exciting for Jon. He had also written a letter, something he had been unable to do for quite some time.

Norm Maxwell
Naturopath

PNEUMONIA & HERPES SIMPLEX

In August 2000, I was doing some electrical wiring under a damp and mouldy house with the temperature near freezing.

When I had finished my breathing had become laboured and I had flu-like symptoms.

Within five days I was in hospital with pneumonia and a temperature of 41.8. I was one and a half days in emergency care with antibiotics being administered intravenously, and then three days in isolation. I was then allowed home under strict bed rest.

I then began on Transfer Factors+, six a day, and was out of bed after two days.

After 10 days I went back to the hospital for a checkup. My Doctor was amazed because he had said it should have taken three months for me to regain a normal lung capacity, and it was already at 98% which was even higher than normal for anyone.

A happy side effect has been that the cold sores I used to get regularly on my lips with exposure the sun have not come back once in the 10 months since I first took the Transfer Factors+.

Brian Hunt

PMS – PRE MENSTRUAL STRESS

I have had a condition called (PMS) Pre Menstrual Stress for the last 3 years.

The five symptoms that I suffered from caused by Estrogen Dominance are...

- breast tenderness
- water retention
- carbohydrate cravings
- mood swings/depression
- fibrocystic breasts

There are a number of other miseries as well – all far more common in pre menopausal women in their forties than one would assume.

I have been taking BioGenistein Plus, 1 tablet a day for 18 months.

Within a month of stating, all of my five symptoms had disappeared.

I still take 1 capsule per day without fail and will continue to do so.

Knowing that this Potent Soy Isoflavone will also help me in my fight against heart disease and cancer is important to me too.

These products have definitely changed my outlook on life and I would recommend them - especially to the menopausal baby-boomer age group.

Vivienne Wengdal

PREGNANCY

I have just given birth to my beautiful Gabrielle - born 19th November 2003, weighing 3045gms - the doctor giving her an at-birth score of 10/10.

I took Transfer Factors 2 months before falling pregnant after 15 months or so of trying.

I continued taking Transfer Factors throughout my entire pregnancy (sometimes 4 per day) when I was really tired, and now look what I have - A PERFECT

LITTLE GIRL, my TRANSFER FACTOR ANGEL. She is so content and gorgeous.

I have such faith in Transfer Factor. As a pregnant mum, naturally I was asking questions about whether I should be taking Transfer Factors during pregnancy. But after reading the documented information, I continued to take it to full-term.

From the very start to the very end, every blood test was perfect, blood pressure was perfect (even though I did suffer from fluid fairly badly - it's gone now though).

I had no morning sickness either (such a major PLUS) – and now I have my beautiful, healthy Gabrielle.

No way would I be without my Transfer Factors every day!

Susan Malcolm

PROSTATE – ELEVATED PSA READING

Following a checkup with my GP and a subsequent blood test, it was discovered that my PSA (Prostate Specific Antigen) reading was "slightly elevated for my age".

I normally take a daily maintenance dose of 3 capsules of Transfer Factors+, 2 capsules of Pycnogenol Maritime Pine Bark extract, and one capsule of Genistein.

I immediately increased my dosages, and for eight weeks took 10 capsules of the Transfer Factors+, 4 of the Pycnogenol, and one of the Genistein per day.

The results... a reduction that had the local practice nurses shaking their heads.

Down from 4.5 to 3.2 in just eight weeks!

Their reaction was, "What on earth did you do to get it down that quick?"

Bill Perrins

PSORIASIS

During May 2000, I decided to see if Transfer Factors could lessen the red-raw, itchy psoriasis down my lower back. This condition arrived after the birth of my last child 16 years ago (my Dad also suffered with it as a teenager).

I proceeded to take the recommended maintenance dose of 1 capsule morning and night and didn't expect a quick fix for something I had had for so long. But during June the itching and the scaliness was reduced. I became aware that I was scratching less and that convinced me to continue.

I then started to also use the Transfer Factors Gel - a topical clear gel containing Transfer Factor - for external use. I decided to attack it from the outside too!

By mid July the redness had gone and itching had stopped - even when I was hot from exercise sessions (when the waistband normally aggravated it).

I am amazed to say that the only thing I now have is scarring from my years of scratching.

But this is also now fading as new skin grows.

Transfer Factors and the Gel have resolved a major health condition for me. I have had it for a very long time and nothing else has ever worked.

I also used a triple dose – 9 capsules per day - of Transfer Factors for my 16-year-old son when he suffered a virus that effected his inner ear, leaving him with no balance and chronic head-spin.

Two days later, he was back at school.

I cannot speak highly enough of this wonderful new, 100% natural product.

Alison Brown

RESPIRATORY INFECTION

Our son was born in 1999 with a benign growth on the inside of his larynx, which meant that it was very difficult for him to breathe properly.

When he was six months old, the surgeon inserted a plastic tube to push back the growth and allow him to breathe. We were told that he would be operated on if necessary when he was older and stronger.

We consulted a Naturopath and the natural medicines she prescribed have – to the Doctor's and our surprise – reduced the growth within six months by 40%.

But a big problem with the inserted tube means that our baby is very prone to respiratory infection, and in August 2000, had a bout in hospital with pneumonia.

Our Naturopath then prescribed Transfer Factors, the contents of one capsule emptied onto a spoon with something to moisten it, and we fed to him that way, twice a day.

Within a couple of weeks of doing this, we noticed a huge difference in him. He is now completely free of infection, bouncing and happy for the first time since his birth.

C Waymouth

SCHOOL SORES

My five-year-old son had school sores covering his arms, legs and lower back.

For three months I had him on antibiotics, continual antibiotic creams and special soaps and shampoos to try and keep his skin from drying out.

I finally started him on Transfer Factors.

He was taking 3 capsules per day and after three weeks, 90% of the sores were gone.

I then changed him onto 2 Transfer Factors+ capsules per day and after three weeks all the sores had completely disappeared. He has not had any further sores for about eight months now.

He now takes just 2-3 Transfer Factors capsules a week for maintenance.

He also has far fewer colds and mild illnesses than he ever used to.

Julie Maddox

SCHOOL SORES & ECZEMA

My 7-year old son developed a bad case of School Sores which I decided to treat using Transfer Factors+ (they were at the stage where normally only antibiotics would touch them.)

Within 2 days of taking 3 capsules a day, there was a slight change in the sores. After a week they were a little less inflamed, and had started to diminish. Every day after that I could see a change for the better.

After 3 weeks the sores cleared, leaving just red marks – but all the scabs had gone.

He also has bad eczema but that has also shown signs of improvement in this time.

My son now has a regular routine of 2 Kids Transfer Factors tablets per day, along with Transfer Factors Gel daily after his bath or shower to help keep his eczema at bay. It is now definitely less fiery, and has cleared a lot. Previously the only product we could find that would control it to this extent was a Hydrocortisone cream. We are much happier using Transfer Factors knowing they are 100% natural and will have no negative affects on him.

Bev Spraggs

SINUSITIS

I have suffered from sinusitis for 15 years.

Over the past few years I have had between 4-5 infections a year.

I have become immune to most forms of sinusitis medications, and antibiotics no longer work for me.

Since taking Transfer Factors and an OPC antioxidant, I rarely get sinusitis, and when I do it is a very mild case.

I have also benefited by not getting colds or flu during the winter.

Julie Erwood

SINUSITIS

I have suffered from a chronic sinusitis condition for over 12 years.

I have had two operations to correct the situation, the second one resulting in a peculiar infection that proved resistant to treatment of any kind – until now that is. It rendered me a virtual social recluse because of its unpleasantness.

Transfer Factors+ was recommended to me and after just one week – taking 4 capsules a day – I experienced a definite improvement.

On occasions I experienced that wonderful sense of smell – a completely new sensation for me. But just as importantly, my outlook became exuberantly positive and often I wanted to smell the flowers to check out my new skill.

It's early days as yet, but every day I feel better. That's apart from the medical improvement. This weekend I increased my dosage to 8 capsules a day.

I am improving every day.

A Scott

SINUSITIS (CAT)

Our 11 year-old Burmese Cat Blarney always had sinusitis. Our vet couldn't do any thing to cure this hence a couple of visits a year to see him for treatment.

Every winter he would get a runny nose. The antibiotics prescribed kept it in check but Barney would still have the sniffles - it did not fix the problem.

We were introduced to Transfer Factors and started to sprinkle a capsule over his food.

We did not have to take the cat to the vet the entire winter. He had no more symptoms of a cold or the runny nose.

When Barney went for his yearly check up recently, the vet could not believe how well he looked. No problems with his breathing, and no sign of the snuffles.

He was not surprised though when I told him what we were doing as he knew about Transfer Factors and was already buying it through a friend

Colin Pepperell

SINUSITIS & RHINITIS

For 30 years I have suffered from severe chronic sinusitis and rhinitis. I have taken many antibiotics and had my sinuses scraped many times.

In July 2000, I went to see a Naturopath who prescribed Transfer Factors+, 3 capsules per day.

By the end of the first week I was down from four large handkerchiefs a day to only one, and I began to smell things for the first time in 20 years.

M Brownley

SKIN CARE

Awesome – that's the only word for the Age Defying Effects. As I'm now into my fifties my skin definitely needed some help.

I've only been using these yummy products for three weeks but the results I see in the mirror now, every

day. Beautiful to use, lovely fresh perfume and **great results**.

Skin not so greasy during the day and the texture on my eye lids and neck tissue has improved already. This much in such a short time, I can't wait to see the results in three months!

Alison McLaren

SKIN GROWTH

I noticed a dark spot appear on the side of my nose near my eye. Within a few days this spot had grown in size and in the following days the area began to get thicker and raised. By this time the skin growth was about 1/4 inch in diameter.

I took Transfer Factors+ orally and also opened a capsule and mixed the contents with some Transfer Factors Gel. I applied this at least three times a day for many days. Nothing seemed to happen at first except that the raised skin growth had stopped growing in size.

Then about 10 days the growth faded and within another day had disappeared altogether.

This is the second time I have had this sort of success with these products. Several months earlier a similar growth appeared on my forehead near my hairline. The skin in both these areas is now quite clear.

I now use TF Gel as part of my normal daily skin care. Just a small amount applied before I put on my moisturiser.

Jan Du Flou

SKIN LESIONS

I have a nursing background and I must say I have been amazed at some of the results I have seen with Transfer Factor. One is very close to home!

My mother noticed a skin lesion about the size of a 20-cent piece on her face. She was expecting to have the lesion excised by her dermatologist, as she had a similar lesion removed a year ago.

After taking Transfer Factor+ for several weeks, the lesion completely disappeared! Not only that, but in its place was SMOOTH SOFT SKIN.

And today she remarked that a smaller lesion on her forehead has also disappeared - and another small angry red area on the other side of her forehead has got smaller.

Naturally she is delighted with these unexpected results.

Pat Millman

STRAINED MUSCLES

A few months ago I began to get a pain in the muscles of my right leg especially when I did any sudden movements.

It gradually got worse, and at times the pain and discomfort got to the stage that I had to take pain killers to help me through it.

I started taking a product called Flex4life and took three capsules daily for seven days during which time the pain and discomfort disappeared.

I experimented by taking one capsule a day as a maintenance dose and this has worked well, although some days when I have been over active or have become overtired, I take a second capsule.

On a recent visit to my doctor who was prescribing a new tablet for my heart condition he mentioned that one of the possible side effects could be a slight muscle strain.

So I showed him the Flex4life pamphlet and mentioned how my leg muscles had improved. His reaction was that it was a very good product as it contains glucosamine and he would recommend it to his patients.

Graham Sheath

SPORTS RECOVERY

I used to struggle at running distances over 800 metres. I did everything to try and improve but nothing would help, no matter what training I did.

I then start taking Transfer Factors+ and immediately felt a change. My muscles that were always so tense after training became relaxed.

The next time I went for a run my lungs were able to handle a greater capacity. I don't get cramps anymore either, and my sinuses have cleared so I don't get breathless and can run longer distances.

Oh, one last thing - I also now get a good nights sleep.

Gary Sebalja

SUPERBUG RECOVERY

After having the operation at North Shore Hospital for the removal of a tumour, my wife had to spend time convalescing.

After four days she developed a "super bug" and over the next two days, the wound developed into what you would describe as a valley. The infection went four centimeters deep and 5 centimeters wide, and the wound was 25 centimeters long.

We immediately panicked and on advice from a friend, my wife started talking Transfer Factors+ at the rate of 12 a day.

After just two weeks the wound had all but healed.

After the doctor had removed the dressing on his fortnightly examination, his words were, and I quote: "I

am witnessing a miracle." When asked why, he said he would have expected it to take at least 12 weeks to achieve this stage (degree) of healing, and that he would have expected the infection to have gotten worse.

He then asked what the patient had been using and upon being told packed up his bag and left!

Henry Kean

TRAVEL SICKNESS

I am 32 years old and for as long as I can remember I have never traveled well on the road.

Even a short trip would have me removing clothing and hanging my head out the window to try and keep the nausea, sweating and dizziness to a minimum. I would be very quiet and feeling the need to be sick.

As you can imagine traveling like this is not something I ever look forward to.

After taking Genistein and Transfer Factors for nine days my husband and I took a three-hour trip. On arrival I couldn't believe how normal I felt. Usually it would take me a good hour to feel okay again.

My husband was so impressed he thought we would take the bendy back roads on the way home. Unbelievable, but this was no problem for me at all and I realised that it was not just luck.

A few days later we took another drive and I even managed to read a four-page brochure without looking up once.

I'm so impressed and now for the first time in my life, I look forward to all our trips away.

Natasha Jones

TROPICAL BITE

A couple of years ago while in Samoa, I contracted a nasty tropical bite to my leg.

Normally I will not take antibiotics, but in this case, with it getting worse instead of better, I went to my doctor. I was recommended erythromycin, which after 5 days had zero effect. Instead it was getting larger, suppurating and becoming more painful by the hour. Another visit to the doctor got double strength of the same drug recommended, with a cream to be applied locally. However, instead of improving, it became worse and was spreading further up the leg, becoming almost intolerable pain wise. After a couple of hours, the pain was excruciating.

At this point I could hardly put my foot to the ground without being in unbearable pain. So unable to walk, I stopped working and elevated it full time, the only way to get comfortable. Even putting it down to the ground needed a heap of courage.

Quite by chance, I was speaking to my naturopath who, it transpired, had had a similar thing happen to her. She recommended that I take Transfer Factor+ at a dosage of 6 a day. I did this, and after 5 days there

was at last no further expansion of the suppurating wound on my leg, and – joy of joys! - I could walk again without screaming pain.

After a further 3 days it actually started to reduce in size. At the same time I applied some powder from the Transfer Factor+ capsule directly to the wound. I continued doing this for about 2 weeks.

Complete healing occurred after another 3 weeks, leaving only scarring where the wound had been.

Anne Iosefa

ULCER - LEG

In May 2000, while I was in the Fiji Islands, a sealice bite on my lower right leg became infected, predominantly with Strep and Staph, which are mostly antibiotic resistant now. It deteriorated alarmingly quickly into a tropical ulcer.

I came back to New Zealand and treated it with many herbs and homoeopathics, both topically and orally.

After three weeks it was so painful that I needed to stop work and keep my leg up. Although I felt well, the ulcer continued to grow until it was 8cms across. I remembered that Transfer Factors had just been introduced into New Zealand and I arranged to get some at once.

I began with Transfer Factors+ capsules, 2 at a time, 5 times a day, and within 24 hours I could see a change. The ulcer stopped growing and began to improve. I also used the Transfer Factors on the ulcer by emptying a capsule into ozone gel and applying that with a dressing. In the next month it had completely healed over.

Lower leg ulcers are notoriously hard to cure and slow to heal. I was impressed as I observed the pace of the healing of my leg.

I have no doubt that, although everything I used was useful – and that I am basically a healthy person – it was the Transfer Factors that gave my immune system the big boost that changed the situation and greatly sped up my recovery time.

Erica Light
Naturopath

VIRAL INFECTION & HAEMORRHOIDS

My usually active 82-year-old mother in Taupo contracted a viral infection and became even more ill on an antibiotic she was prescribed. It caused her to develop intensely painful haemorrhoids.

My brother brought her to be with me in Rotorua, and when she arrived she was obviously very sick and in extreme pain. A relative who is a nurse said she should immediately be admitted to hospital. However I suggested she stay with me for at least 24 hours to use some natural remedies, and then the nurse could check again.

I immediately began to give my mother Transfer Factors+. I gave her 3 capsules every four hours

through the night and all the next day and night. She also used it internally several times – a mixture I made from the Transfer Factors+ powder and a gel.

When the nurse visited us the next morning, she was amazed at my mother's obvious recovery. She actually said, "This is a miracle!" My mother's pain had completely gone; she had her colour back and was able to move around.

One week later after my mother had gone back to Taupo, I rang to check on her. She had just come back – on her motorbike! - from a meeting at which she had given a presentation. To think that she had been so sick, and yet within such a short time, using the Transfer Factors, she is quite well again.

Beth Duncan
Naturopath

UTI INFECTIONS

I have had UTI infections for 6 months.

My doctor put me on anti-biotics for 3 months. Each course cleared it up, but then it would come back again.

So I decided NOT to take the antibiotics any more and just took Transfer Factors+ and haven't had a problem since.

Maree Jewell

VIRUS & PAIN

A few months ago I got very sick with a virus which left me, still several months later, sometime gasping for air.

Since taking Transfer Factors+ that has disappeared. I have more energy and seem to be able to achieve so much more.

If I even start to feel slight sick I up my dosage of Transfer Factors+ and so far this winter have not had any of the illnesses that most people seem to be getting.

Also due to operations and cutting myself I have several nerves that have been cut, which have left those areas very sensitive and sometimes painful. Since taking Transfer Factors+ I have noticed that those areas are not as painful or sensitive as they used to be.

Colleen Drummond

WARTS

We use TF RenewAll every day, and for all sorts of things. It's been used for eczema, sunburn, burns, grazes, cuts, cold sores - & just about every external use you can think of.

So I don't know why it took me so long to try it on the wart on my finger.

I diligently applied a small bit to my wart every night before going to bed. After 3-4 weeks, the wart lifted and within a couple of days flicked out completely, leaving a small hole. Continued use of TF RenewAll saw it **completely** healed within 3 days – no sign left.

Bev Spraggs

WEIGHTLOSS

I was the heaviest I'd been for a very long time, I put that down to having two babies quite close together and being depressed.

I found myself finding comfort in glorious chocolate, fish 'n' chips and fizzy drinks and lots of other unhealthy foods. This only helped short term then I would go back to feeling depressed again and gaining more weight – and so the cycle continued.

When I discovered Transfer Factor, I purchased it for the purpose of helping me and my family to fight off the "flu" and other nasty germs.

I didn't realise it was going to change my whole life!

One day someone pointed out to that I'd lost weight. I quickly jumped on the scales and sure enough I had,

I had lost a whopping 8 kg in just two and a half months – and I didn't even know it. When I finally stopped jumping around and sat down to get over the shock, I realised that I hadn't been depressed and hadn't turned to my usual "comfort food" in all this time.

Transfer factor is the one for me and I'll continue to take Transfer Factor as it has truly turned my life around.

Lisa Ah Honi

WEIGHTLOSS

After taking this company's "Shape" weightloss product for just 5 days, I noticed the pants that I had trouble buttoning up at the waist were no longer a problem.

Also I didn't need help putting on my socks.

Joe McKenzie Jnr

WELL-BEING

I started taking Transfer Factor even though I consider myself a 'well' person. But as I've advanced in years, I found that at the end of a working day I was getting very tired.

After just a few days on Transfer Factor I had more energy, felt better within myself and was not as weary as I had been, right up to the time of going to bed..

Rob McLaren
