AWARD

INTERESTS

RESPONSIBILITIES:

Consultation, design work, layout, material selection and fabrication to final installation. I am also the Lead Technology Influencer responsible for researching and buying equipment, computers and software.

RESPONSIBILITIES:

As an instructor it is my goal to have students not only meet core competencies but to exceed them.

RESPONSIBILITIES:

Building sub-assemblies in turn using them to build various printing and paper processing devices Testing and qualifying before shipment to ensure client satisfaction.

RESPONSIBILITIES:

Fabrication and repair of metal products and equipment using various types of welding machines, tools and techniques.

SKILLS ACQUIRED:

Focus on graphic design for media and web. Coursework will allow me run my business more efficiently. I will also be able to bring this knowledge into the classroom.

SKILLS ACQUIRED:

Faculty Quality Assurance System coursework consisted of course building, content management, diversity training and core strategies. Certification allows me to teach at the college level.

SKILLS ACQUIRED:

Classes were varied and based on an entrepreneurial track to better run my business. Coursework included design, typography, illustration, prototyping and supply chain management.

Precious Metals Car Show
First place

Trophy was earned for truck I built in my home shop.
