

SERVICE BULLETIN ML 0024

Date : 18 July, 2001
Game : Slam'N'Jam, Timebuster & Sonic Beat
Subject : Sound Program Update

Distribution List :- info@lai.com.au; techforum@lai.com.au; www.lai.com
LAI Games :- Australia, New Zealand, Singapore and USA
Timezone FEC :- Australia, India, Indonesia, New Zealand, Philippines and Singapore

Problem : Game makes whistling sound during power up or reset and pops or clicks while playing sounds.

Solution : Replace Sound Program on Sound Board with new update for your game.

Instructions : Replacement or exchange EPROMs can be made available at your nearest LAI Games Distributor. Alternatively If you have access to an EPROM Eraser and Programmer you can reprogram the 27C64 EPROM on the sound board with the new binary file for that game.

Note:- The Update Sound Program binary ROM images can be downloaded from http://www.geocities.com/laigames/Service_Bulletins.htm or come as file attachments if you received this services bulletin by e-mail. File name descriptions are;

SJsd1_1.bin: Slam'N'Jam sound version 1.1
TBsd1_1.bin Timebusters sound version 1.1
SBsd1_1.bin: Sonic Beat sound version 1.1

The files should be loaded into your EPROM Programmer software as binary at a offset address of zero.

Regards

LAI Games
