

The 'Hanuma' of modern era

(According to history Hanuma is actually not a friend of our nation he came to destroy our country)

- There are milestones in the history that change the path of the country.
- 1948, 1956 and 1972 marked very important millstone in SL politics.
- But it was 1977 that was the beginning of very unfortunate path which got two peaks at **1983 (communal black clashes) and 1988 (JVP insurgency)**.
- JR boast of the powers of being the executive president of socialist republic of Sri Lanka. But this emerald island **got the flame of ethnic violance since 1983 and still its burning.**
- Similarly JR allowed to **spread the flame of terrorism**, unrest and cultural deserting.
- He **allowed Tamil terrorism to peak**, for which we are still paying the price.
- On the other hand, he allowed second JVP insurgency to reap and **over 20,000 Sinhala youth paid the price in their lives.**
- When JR left politics in 1989, he failed to crush either LTTE terrorism or JVP insurgency (which was ultimately crushed by Mr. R. Premadasa) and **Indian army had been landed in our mother land. The culture and values of the society was corroded.** In short, both north and south was burning.
- **What else this old fox could not have done to our mother land?** He did the entire curse and retired as atypical politician without much of a buzz.
- According to 'Ramayanaya', Hanuma has burnt the Helabimma (Sri Lanka) by spreading flames using its tail.
- Interestingly, very few seem to be interested or contemplate on these facts. This is a country where **thought of the people is regulated by the media which in turn controlled by the political parties.**
- So no wonder why the **'Hanuma' of the modern era is still having the inflated image of professionalism after dragging this country into flame of terrorism and misery.**
