READING REPORT FORM

Four Reading Reports are due throughout the semester. Each Reading Report begins with the student name and section # . For your convenience the required reading assignments are listed below in their assigned order. *Please circle any assignment(s) you did not complete.* If you read part of an assignment, write in the page numbers or passages that you did not read. For each Reading Report, students are required to read the NOAB notes for at least three daily scripture assignments. Please indicate the number of times you read the notes for each assignment period. Out of respect for God's creation the same form will be used for all four reports (there are extra forms on the instructor's website if you lose yours.) Ten bonus points will be given if the same form is used throughout the semester.
