To Whom It May Concern,

I am applying for the Graphic Designer position at Branded Screen Printing for many, many reasons, but I will only include a few here to spare your time! I have worked in Human Resources for a gaming and lottery company for almost five years, and have realized my passion has always lied in design. This past summer I finally worked up the courage to take the steps necessary to change my career path and pursue another Bachelor's degree in Graphic Design with a concentration in Web Design.

To begin my career transition, I began interning at a digital media company called Onyx Digital Media where I performed a variety of tasks and really got my feet wet in the world of Graphic Design. I learned the ins and outs of Photoshop and Illustrator and would assist with any job my mentor was working on at the time. This included editing images for real estate agents, creating, updating and changing content on websites using Joomla, designing advertisements, fliers and logos for various clients and much more. I am currently still working with Onyx.

Thank you for taking the time to review my qualifications. I look forward to future discussions of how I could provide value to the organization.
