December 22, 2000

To Whom It May Concern:

AuditMaster Inc. is a Toronto based software company founded in 1995. Our flagship product AuditMaster is a database-auditing package that is used worldwide to provide companies with increased security and audit ability for their database applications.

From January 2000 to December 2000, Louis Byrne was under my direct supervision as a Network Administrator. He was assigned the task of maintaining an network environment used for the purpose of testing AuditMaster prior to the release of version 5 of the product. He was responsible for setting up and configuring machines and helping others to troubleshoot their problems. He was also responsible for developing an FAQ tracking database on Lotus Domino that will be used to provide e-support to AuditMaster customers.

Louis is a reliable and hard working individual. He always has an enthusiastic attitude towards work and is capable of working with minimal supervision. He is a creative individual who loves to learn and he gets along well with everyone. I am sure that he has a great future ahead of him.

John Evans
Vice-President Quality Engineering
AuditMaster Inc.
