## BACKGROUND INFORMATION

---

I retired early as a result of an automobile accident that occurred in 2002. When I was unable to recover fully while commuting in a heavy traffic situation, my wife Phyllis suggested I retire at the end of 2005 and that we become full time RVers. While I do not have the remarkable stamina I had before the accident, I have improved considerably.

We have two grown children and travel with two small dogs.

**NOTES:** I held a factory job and 2 computer programming jobs (with companies that no longer exist) between 1974 and 1981. I was never unemployed. These jobs probably are not relevant but information can be provided if desired. Employment history before and during college is not listed here. Part time jobs are not listed. These include but are not limited to College Adjunct Faculty (teaching evening classes for Indianapolis University and IVY Tech at Indianapolis), photo finishing, and wedding photography.

Since my retirement I have held various workamping jobs in widely divergent locations that are not relevant to computer jobs. I have also taught some classes and consulted with individual computer owners.
