# L.T.R INSTRUMENTS

LTR Instruments specializes in the production of measure instruments that are based on slight temperature changes.

**LTR** is an integrated solution company purpose-built for solving unique problems.

We create flexible innovative products.

Our reliable instruments are engineered with profound technological knowledge .We offer products that meet today's needs and develop new products that exceed tomorrow's expectations.

The LTR corporate goal is to achieve a state of art quality to its products, thereby satisfying customers all over the world.

# L.T.R INSTRUMENTS

Our leading instruments

## **LTR**

Linear Temperature Recorder

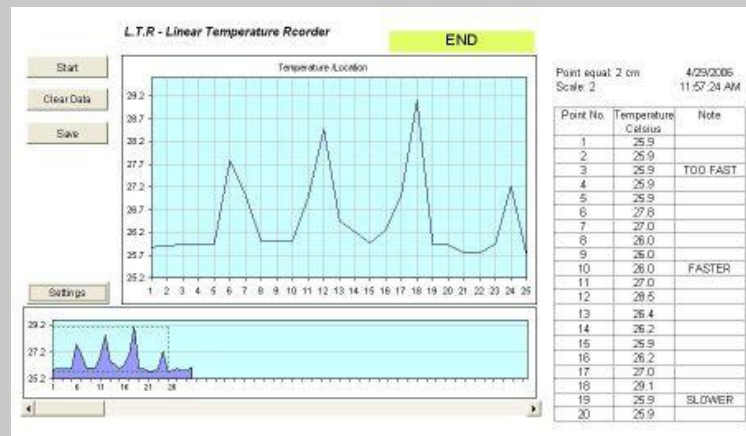

## **LLD**

Liquid Level Detector.

## **LTR - Linear Temperature Recorder**

The instrument measures quickly slight differences in temperature ( 0.1 F ) of a surface along a track. Software, especially developed, draws a line graph of the temperature of the measured surface.

Our leading instruments

## LTR

Linear Temperature Recorder

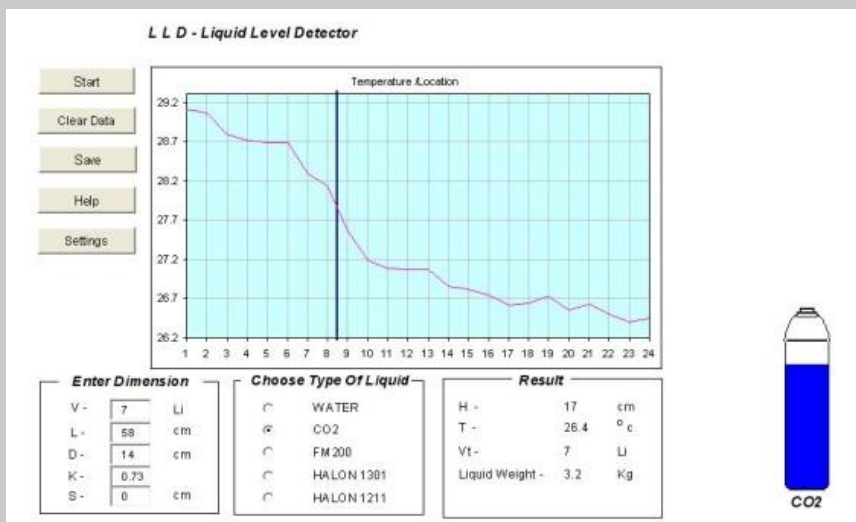

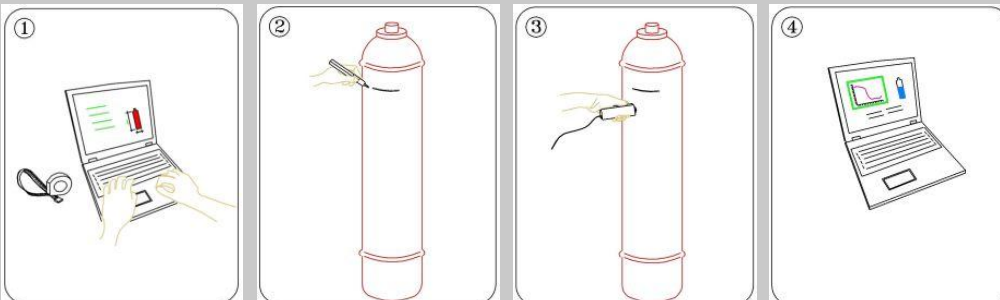

## LLD

Liquid Level Detector.

### LLD - Liquid Level Detector.

The instrument finds the liquid level of a fluid in a closed container. Software especially developed, calculates the weight of the liquid in the container. It allows for finding the contents of a container under pressure.

For example: liquefied gas in containers, fire extinguishers, CO2 cylinders or a range of other chemical substances for industrial use.
