

October 11, 2006

Dear Teachers,

In an effort to gather as much input from as many stakeholders as possible as we update our district technology plan we are asking that you take the online survey regarding your thoughts on technology use in education. This will take between five and ten minutes, and can be done anonymously. However, if you choose to sign your name, you will be entered in a drawing for a wireless mouse!

Clicking on the following URL (or entering it into your web browser) will take you straight to the survey. Thank you in advance for your valuable input.
