Re: References for Sandor Beresenyi

Békéscsaba, 22-04-2005

Sandor Beresenyi - a qualified Geographer - has translated 12 pages of technical material from English into Hungarian for my book in preparation *Town Ecology* (Városökológia), with a topic of sustainable transportation development that included "fine examples" of public transport, traffic control and environmentally friendly solutions in town planning and urbanisation.

His translations were written in excellent style, hence I would recommend the services of Sandor Beresenyi to all professionals who might require translation in this subject.

Dr Imre Nagy PhD
Geographer, Senior Research Fellow
Lecturer, Head of Department
