May 20, 2005

To Whom It May Concern:

I have had the opportunity to work with Mr. Douglas Perez Since September 2004. Since that time, I have watched him grow professionally and find him to be a very qualified, self-motivating person who is not only respected by the administrative staff but also by his peers and students.

As a Teacher Specialist in the Vocational Education/ROP programs, I look to Mr. Perez to teach the ROP Computer Application & Web Design Class. He is qualified in all aspects of computer education including curriculum development, planning, developing and implementing staff development activities. He has an awareness of community needs and has that special rapport with his students that ensures their success.

Mr. Perez's commitment to excellence in his personal and professional growth goes far beyond that of an average teacher. The combination of his educational background, dedication, and his humanistic approach to education makes him invaluable.

I strongly recommend him for any position he desires in education and/or industry; he will quickly become an asset to that institution.

His absence will be a major loss to our department and a replacement of his caliber will not easily be found.

I wish him well and congratulate those with whom he will be working.

Respectfully,

Paul G. Ureña, Ph.D.

Teacher Specialist/Project Officer
