

No more Gender Disphoria!

Demonstration for the Transgender, Transexual and Intersexual struggle

Sunday, October 7 2007, 18h00 - Pl. Universitat (Barcelone)

The slogan "No more gender disphoria!" is a cry against the psychiatric diagnose of gender disphoria.

Because being Trans doesn't mean that we are mental disabled; building gender outside of the norms established by medicine and governments does not mean we are disturbed. We want our voice to be heard and not being treated as victims or as political disabled. And because we want to have the righth to decide about our own bodies, the Trans activists signing this manifesto demand the retreat of the "Gender Identity Disorder" of the International Classification of Illnesses, and the complete depathologization of Trans identities.

Appeal: Guerrilla Travolaka and independent activists
