

## Quadratic Formula Program

Hit {PRGM}

```
EXEC EDIT NEW  
1 Create New
```

```
PROGRAM  
Name=QUAD
```

```
PROGRAM:QUAD  
:Disp "ENTER A"  
:Input A  
:Disp "ENTER B"  
:Input B  
:Disp "ENTER C"  
:Input C  
:(-B+(J(B^2-(4*A*
```

```
PROGRAM:QUAD  
C))))/(2A)+D  
:(-B-(J(B^2-(4*A*  
C))))/(2A)+E  
:Disp "THE SOLUT  
IONS ARE"  
:Disp D  
:Disp E
```

```
PROGRAM:QUAD  
:Disp "MR CZAPLE  
WSKI"  
:Disp "IS THE BE  
ST"
```

If the text above has a capital letter followed by lower case letters you must find that function on the calculator. Most of these are found by hitting the {PRGM} button. If all capital letters appear you can enter these by hitting the {ALPHA} button followed by each individual letter. You can type the arrow by hitting the {STO} button above the {ON} key.
