Dave Potter, journeyman electrical lineman for Arizona Public Service experienced a flash fire from an electrical panel which threw him on the ground. The County Burn Unit gave him an expensive ointment which was basically petroleum. They thought they might have to do grafting on his ear. His wife, District Manager, Margaret Potter gave him Intelligence cleansing gel and skin conditioning oil instead of the ointment for this electrical burn. The medical staff was shocked at how quickly his burns healed. Dave said the skin conditioning oil really helped ease the pain. No grafting was necessary!
