# Hubert Duhamel, - a firm value among the Belgian top-racers

For several years now has Hubert managed to line up an impressive collection of awards.

In **1992** he became the **Mister Pau**, after winning a whole series of prizes on this flight, more specifically the **first series of five pigeons at the International Pau** of the German Federation; **the first series of two pigeons at national Pau**... The same year he was the **first champion of Cureghem Centre Long Distance** with two nominated pigeons at Cahors and Barcelona, **first champion Steeple Cup** at Brive, Cahors, Montauban, Barcelona, Limoges two-year olds, Limoges yearlings also with the first two nominated. He had the **first ace-pigeon in the category of three-year olds** at Brive 1990-91-92, as well as **the first ace-pigeon** in the category of four-year old pigeons at Brive 1989-90-91-92, **the first ace-pigeon two-year olds** at Pau 1991-92 and a number of other fantastic awards.

One of his biggest victories was **Bourges 1997**; he won **the first national against 19381** competitors, his pigeons reached the highest speed from more than 32000 pigeons.

His "**Jonge Prins**" **3305069/1998** became the **2nd ace pigeons of Europe 2002** at Pau, Dax and Perpignan, a very highly appreciated performance. In this memorable year Hubert became also the **2nd Champion of Belgium's Extreme Long Distance KBDB**.

In **2003** he added another jewel to his already splendid collection when he won the **2nd ace-pigeon Extreme Long Distance KBKB**. The super pigeons got in 2003 their opportunity to show off their class.

Year **2004** began fabulously at Bourges with **19th and 82th national** against 23694 pigeons, followed by **4th club 455 pigeons, 7th national 2180 pigeons, 14th international 8116 pigeons at Pau.....**

Hubert is truly a fancier that breeds super pigeons very easily

The origin of his pigeons is **Huyskens-Van Riel**; there aren't many other strains bred into his pigeons, so we can really talk about a strain of high quality pigeons that perform very well on distances from 400 km to 1050 km in all sorts of weather, but particularly in bad weather.
