

Design a Bridge

Notes: All pieces shown are $1/8 \times 3/8$ and will be used for the roadbed.
All roadbeds will conform to the dimensions on this drawing.

All roadbeds should have a minimum of 3 crosspieces.
The 2 at the ends will be placed as shown, any others can be placed anywhere you like.

The top structure is only shown to indicate the maximum overall height.
Your design can be of any configuration you like as long as it meets the length width and height dimensions. $1/8 \times 3/8$ can be used, $1/16 \times 3/8$ is available for arches.
