If your need for a facsimile system includes speed, versatility and reliability, the OKIFAX 5650 is your solution.

The advanced features of the OKIFAX 5650 offer the flexibility and performance of larger, more expensive products combined with the reliability you've come to expect from OKI.

Designed for the busy office, the OKIFAX 5650 delivers clean 600 dpi class printing at a brisk 8 page per minute rate.

The 33.6 Kbps modem quickly transmits a page in a mere 3 seconds, lowering telephone costs. The OKIFAX 5650 also features dual access, so you can set up an outgoing fax while another comes in, increasing efficiency.

Pressed for time? The 30- sheet feeder lets you scan a document into memory, enter dialing instructions, and walk away. Programmable speed dialing allows you to dial frequently- called numbers at the touch of a single button for greater efficiency.

Efficient and Flexible

The OKIFAX 5650 uses digital LED technology, a breakthrough OKI innovation that outperforms laser technology. The patented LED printhead has no moving parts, and delivers a crisp, clean print.

The optional 500- sheet letter/ legal paper tray triples paper capacity to 750 sheets, so you spend less time servicing your facsimile and more time working. Standard memory lets you scan and store up to 200 pages. This is an important feature if you receive faxes after hours. Add the optional 4 MB memory expansion card to store up to 520 pages electronically — important if the power is cut, or if paper supply or toner unexpectedly runs out. An optional telephone handset is also available for voice confirmation of faxes.

With the optional PRO MFP kit you get everything you need to connect your OKIFAX 5650 to a PC and print, fax, copy and scan right from your desktop. With the optional PRO LAN Kit, your OKIFAX 5650 can be used additionally to send faxes via a PC on the network.

Fast, flexible, versatile and reliable, the OKIFAX 5650 delivers crisp high quality output and fast high performance. The OKIFAX 5650 is the fast, full-featured fax solution with multi-function and network fax options for growing businesses.
