

| <b>B</b> | <b>D</b> | <b>S</b> | <b>Third Quarter Learning Goals</b>  |
|----------|----------|----------|--|
|          |          |          | 1. Measure objects to the nearest centimeter. (6a)                                     |
|          |          |          | 2. Understand digital notation for time. (6b)  |
|          |          |          | 3. Calculate the value of coin combinations: P, N, D, and Q. (6d)                      |
|          |          |          | 4. Make change for amounts less than \$1. (8a)   |
|          |          |          | 5. Count sets of quarter, dimes, nickels, and pennies. (8c)                            |
|          |          |          | 6. Understand place value for 10s and 1s. (8e)   |
|          |          |          | 7. Find many names for a number. (6e)  |
|          |          |          | 8. Identify 3-dimensional shapes and know their characteristics. (7a)                  |
|          |          |          | 9. Identify symmetrical figures. (7b)  |
|          |          |          | 10. Sort and identify objects by attributes. (7c)                                      |
|          |          |          | 11. Identify polygons and know their characteristics. (7d)                             |
|          |          |          | 12. Identify fractional parts of regions and sets with a focus on unit fractions. (8b) |
|          |          |          | 13. Know addition facts for +1, +0, doubles, and sums of 10. (6c, 7e, 8f)              |
|          |          |          | 14. Solve number stories. (8d)   |
|          |          |          |  |
|          |          |          |  |
