

# Penny-Dice Game

## Rules:

1. This game should be played in partners.
2. Players pool their pennies so they have at least 20 pennies together.
3. Students take turns rolling the die and picking up as many pennies as indicated on the die until all the pennies have been picked up.
4. Either the player with more pennies wins the game, or partners may flip a penny to determine whether the player with more or fewer pennies wins.

Note: To pick up the last pennies, the number on the die must match the number of pennies remaining.
