

Southwind **Storm**®

FLEETWOOD® RV

Checked the weather lately? There's a big Storm heading this way.

How does the new Storm manage to offer so many of the finer things associated with higher-end motor homes for such a modest price?

We start with the basics. Fleetwood's Power Platform II with an advanced chassis design results in greater structural strength and a smoother ride. Then we add a restyled fiberglass front cap and an expansive automotive-bonded windshield for an impressive view from both inside and out. We didn't stop there—we addressed the interior with the same panache, including hardy alder wood cabinetry, dove-tail drawer construction, and day/night shades for enhanced intimacy. The driver's compartment is built for convenience, featuring a map storage area, telephone power port and improved lighting. Adding them all up, it's easy to see why Storm's features, options, and designs make it the clear favorite as Fleetwood's most affordable wide-body motor home in any kind of weather.

The Power Platform II Makes The Difference

Southwind Storm's quality begins long before the features come on board. We begin by building on our exclusive Power Platform II, a unique truss design welded together using tubular steel that's durable, strong, and dependable. The result is a quiet and nearly flawless ride, increased floor strength, and substantially more storage space below. An all-steel foundation further reduces stress loads on the sidewalls and minimizes chassis flex on uneven roads.

Drawing is for illustrative purpose only to highlight aspects of motor home construction. Actual motor home design depends on model and is subject to change.

1. GVWR (Gross Vehicle Weight Rating): Means the maximum permissible weight of this motor home. The GVWR is equal to or greater than the sum of the unloaded vehicle weight plus the net carrying capacity.
2. GAWR (Gross Axle Weight Rating): Means the maximum permissible loaded weight a specific axle is designed to carry.
3. Base Weight: Means the weight of the motor home without fuel, options, water, cargo, or passengers.
4. GCWR (Gross Combination Weight Rating): Means the value specified by the motor home manufacturer as the maximum allowable loaded weight of this motor home with its towed trailer or towed vehicle. Towing and braking capacities may differ. Refer to Fleetwood and chassis manufacturer manuals for complete information.
