

More Practice with Net Ionic Equations

For problems 1-5, write 1) balanced molecular equations 2) total ionic equation and 3) net ionic equation for the following double displacement reactions:

1) Sodium phosphate solution is added to a solution of cobalt (III) chloride.

2) Calcium chloride solution is added to a solution of sodium carbonate.

3) Copper (II) sulfate solution is added to a solution of sodium hydroxide.

4) Silver nitrate solution is added to a solution of strontium chloride.

5) Sodium hydroxide solution is added to sulfuric acid.
