

telecommunication: Any transmission, *emission* or reception of signs, signals, writings, images and sounds or intelligence of any nature by wire, *radio*, optical or other electromagnetic systems (CS).

fixed-satellite service: A *radiocommunication service* between *earth stations* at given positions, when one or more *satellites* are used; the given position may be a specified fixed point or any fixed point within specified areas; in some cases this service includes satellite-to-satellite links, which may also be operated in the *inter-satellite service*; the fixed-satellite service may also include *feeder links* for other *space radiocommunication services*.

inter-satellite service: A *radiocommunication service* providing links between artificial *satellites*.

mobile service: A *radiocommunication service* between *mobile* and *land stations*, or between *mobile stations* (CV).

radio navigation: *Radiodetermination* used for the purposes of navigation, including obstruction warning.
