

Thermojetics® Green Ephedra Free

More than 60 percent of adult Americans are overweight – that means approximately 100 million people. Aside from the aesthetic concern, being overweight also has potentially devastating health consequences. Studies show that those who are even 10 percent over their ideal weight increase their risk of developing such life-threatening conditions as diabetes, coronary heart disease, cancer and stroke.

Thermojetics® Green Ephedra Free can help. It contains a blend of carefully selected herbs and botanicals designed to increase energy, promote thermogenesis and help control appetite.* By increasing the rate at which your body burns fat and helping to curb appetite, Thermojetics® Green Ephedra Free allows you to overcome two important obstacles to weight-loss and to achieve results quickly, easily and safely.*

Thermojetics® Green Ephedra Free contains five herbal extracts that are scientifically proven to support weight loss, including citrus aurantium (bitter orange extracts of fruit and peel), green tea, yerba maté, cocoa and Bioperine® (black pepper extract). These plant factors work synergistically to adjust metabolism at the cellular level so your body is able to burn stored fat more efficiently.* As it does, you not only lose weight faster, you also have more energy and feel better.*

Discussion Points

- **Faster fat burning.** Citrus aurantium (bitter orange) contains a substance known as synephrine, which increases the body's resting metabolic rate so that the body burns calories more efficiently.* Synephrine also increases the rate at which fat is released from the body's stores to be converted into energy.*
- **Natural appetite control.** Yerba maté tea extract is especially helpful for weight loss because of its thermogenic and appetite-suppressing properties.* Studies also show that it contains polyphenols, which support fat metabolism.*
- **Metabolic boost.** Green tea has a thermogenic effect in the body, beyond the natural thermogenic activity associated with its caffeine content. In addition, green tea contains substances called catechins, which have been shown to inhibit the body's fat-storing process.*
- **Energizing cocoa.** Cocoa (also known as cacao) is the same plant from which chocolate is made. It contains alkaloids known to support the nervous system, improve energy and promote fat burning.* Cocoa is also a powerful antioxidant.*
- **Enhanced absorption.** Black pepper extract improves the body's ability to absorb nutrients from the digestive tract and enhances overall thermogenic activity.*

Did You Know?

- Citrus aurantium (also known as zhi shi) is a traditional herbal remedy that has been used for thousands of years in China to stimulate gastrointestinal activity, improve circulation and enhance liver function.
- Yerba maté is a popular South American tea enjoyed around the world for its flavor and energy-boosting properties. It helps reduce fatigue, supports the balance of the nervous system and promotes mental clarity. A study showed it to be the most effective thermogenic herb when compared with other thermogenic plants.

Fast Facts

- Helps your body burn fat faster.*
- Reduces hunger pangs that can lead to overeating and weight gain.*
- Acts as an energy booster without causing irritability and restlessness.*
- Has no ephedra-containing herbs.
- Take one tablet twice a day in conjunction with Thermojetics® Beige.
- Use as part of the Thermojetics® Green Weight-Management Program or Thermojetics® Gold High-Protein, Low-Carb Program.
