To whom it may concern

Object: appreciation letter

Dear Sirs,

As a nuclear scientist, Director at the Atomic Energy Commissary of Algeria from 1999 to 2002, I had the occasion to work with Dr Mohamed Nadir Boucherit who was at that time leading several corrosion related projects at the Birine Nuclear Research Center. In this context I was able to appreciate the quality, the perseverance and the determination that Dr. M.N. Boucherit had in conducting and achieving his duties.

Dr. M.N. Boucherit has undoubtedly brought a great deal of improvement to the activities of the Chemistry Department or the Scientific Board which he lead with determination.

I would not prevent to mention the tremendous help that Dr. M.N. Boucherit had provided during the same period to many young scientists as a researcher adviser and as a team leader while assisting them in their various activities.

I am convinced that Dr. M.N. Boucherit is capable to contribute efficiently with his experience and acquired knowledge to carry out his duties with responsibility, and I wish him a valuable and great success.

Sincerely,

Youcef TOUIL
