- Testing Methodologies
- Defect Management
- Problem-Solving Skills
- Time Management
- Prototype/ Mock-ups
- Defect Tracking Tool
- Automated Testing
- API Testing
- Performance Testing
- E-Commerce Website
- Payment Gateways

EDUCATION

BS Software Engineering
Riphah International University
2011 - 2015

INTERESTS

- Climbing
- Snowboarding
- Cooking

SMART AI Application

AI application combines cutting-edge technology to provide monitoring and analysis capabilities. Designed for object detection and classification, System accurately identify and categorize objects in real-time. Whether it's recognizing Military Vehicles, Civilian Vehicles, Person, Soldier or other items, our application ensures precision and reliability. In addition to its object detection features, the application seamlessly integrates with smartwatches to monitor and analyze personal health metrics. By leveraging built-in sensors, such as heart rate monitors and activity trackers, our system gathers essential health data. Through advanced machine learning algorithms, it processes this data to offer insights into the user's well-being

Job Portal

Job portal serves as a bridge between brands seeking to leverage social media influencers for product promotion and influencers eager to collaborate with these brands. Through that platform, brands can easily connect with a diverse pool of influencers across various social media platforms, ensuring maximum reach and engagement for their products. Influencers on our platform gain access to a wide range of promotional opportunities, ranging from sponsored posts and product reviews to brand partnerships and event promotions

HealthExUS

HealthExus is a cutting-edge, cloud-based system crafted to facilitate seamless collaboration within the healthcare industry while ensuring strict adherence to HIPAA regulations. By serving as a centralized platform, HealthExus connects clinics, healthcare professionals, and operating and service companies, streamlining workflow management and enhancing efficiency across the board

Nitro Tickets

Nitro Ticket is a online ticketing system designed to provide a seamless experience for individuals and groups interested in attending live fights. Nitro Ticket offers a platform for purchasing seats and securing access to the action-packed events. Through our user-friendly interface, customers can effortlessly browse upcoming fights, view seating options, and select their preferred seats, either individually or as part of a group. Our intuitive booking process ensures a hassle-free experience, allowing fans to secure their tickets with ease and convenience.

Scarta Attendance Solution

Scarta is an innovative attendance solution that addresses the challenge of proxy attendance in schools and streamlines the calculation of office timings. Scarta provides a reliable and efficient way to monitor attendance, ensuring accuracy and accountability in educational and professional settings. In schools, Scarta utilizes RFID Card and biometric authentication methods to verify the identity of students, effectively eliminating the possibility of proxy attendance. By accurately tracking the presence of each student, Scarta helps educators maintain a more secure and transparent learning environment, fostering a culture of accountability and punctuality.

Social Media Crawling Application

Social media crawling solution employs advanced AI algorithms to analyze content across various social media platforms, extracting valuable insights and sentiments from the data. By leveraging sophisticated crawling techniques, the system scours targeted social media channels, collecting a wide range of posts, comments, and interactions. Data undergoes analysis using AI-powered sentiment analysis algorithms. These algorithms apply natural language processing (NLP) techniques to decipher the sentiment expressed within the text, categorizing it as positive, negative, or neutral

E-Commerce Application

E-Commerce platform revolutionizes the online shopping experience by providing a centralized marketplace where multiple companies can showcase and sell their products collectively. consumers gain access to an extensive selection of products from various brands, all conveniently located under one virtual roof. A powerful avenue to expand their reach and tap into new markets without the overhead costs associated with maintaining individual online stores. By registering on our platform, businesses can showcase their products to a diverse audience of online shoppers, increasing visibility and driving sales.

Engtec

Engtec is a time logging system designed to streamline time tracking and invoicing processes for busines. By providing a user-friendly platform for employees to input their working hours, Engtec simplifies the task of recording and managing time data across diverse projects and tasks. One of Engtec's key features is its ability to generate diverse invoices based on the recorded time data. By integrating with billing and invoicing systems

Jimmy Aja ERP

The ERP system provides a comprehensive solution for overseeing various office tasks, ranging from requisition management to payroll management and others. By integrating multiple functions into a single platform, the ERP system streamlines operations, enhances efficiency, and promotes collaboration across departments. JimmyAja serves as a powerful tool for optimizing office tasks and processes, improving productivity, and enhancing the overall operational efficiency of organizations.

IR Pro Financial Application

IR is a comprehensive financial application that serves as a one-stop platform for a variety of financial services, including financial prediction, profit sharing, and other related functionalities. Designed to meet the diverse needs of investors, traders, and financial professionals. Furthermore IR canbe used to communicate between ivestor and financial companies for their financials related issues
