

Research Papers
on
Sealed Radioactive Source Studies

Arora, R.P., Mukherjee, P., Bhakta, R.N. and Bahadur, J. (1974). Radiation technique for monitoring the deep drainage in irrigated wheat fields , Proc. symp. Application of isotope techniques in Hydrology and Hydraulics. Poona Nov. 26-27 p.342.

Bhishm Kumar, B.P. Singh and Satish Chandra (1977), Determination of soil moisture profile in unsaturated strata by Gamma-Ray Attenuation Method, Proceedings of the National Symposium on Isotope and Application in Industry, BARC, Bombay, Feb. 2-5, pp. 365-367, 1977.

Bhishm Kumar and B.P. Singh (1979), Gamma-Ray Transmission Method for the in-situ evaluation of the characteristics of soil water system, International symposium on in-situ Testing of Soils and Rocks and Performance of Structures.

Bhishm Kumar and B.P. Singh (1979), A quick and accurate calibration of the Gamma-Ray Transmission Method for the study of a soil water system, Applied Radiation and Isotopes 30:493-495.

Bhishm Kumar and B. P. Singh (1980), Correction of count-rate variation due to gain shifts in the Gamma Ray Transmission method, Indian Journal of Physics, Vol.19, PP. 49-52, 1980.

Bhishm Kumar and R. C. Saxena (1982), Evaporation studies of soil water system using Gamma-Ray Transmission method, International Symposium on Hydrological Aspects of Mountainous Watersheds, Roorkee, Nov. 4-6, 1982, Vol.I, PP. 15-19.

Bhishm Kumar and R.C. Saxena (1983), A new technique for the evaluation of specific yield in-situ by Gamma-Ray Transmission Technique, Proceedings of a Seminar on Ground Water Development, PP. 199-206, Dec. 19-20, 1983, Roorkee.

Bhishm Kumar and B.P. Singh (1989), A new approach for Automatic Count Rate Stabilization, International Journal Nuclear Instruments and Methods in Physics Research, A 274, PP. 406-408.

Bhishm Kumar and A.K. Dwivedi (1992), Instrumentation and measurement techniques for the study of water equivalent of snow, snow-pack and glacier using isotope technique, Intl. Conf. Hyd. of Mountainous areas, 28-30 May, 1992, Shimla, India.

Bhishm Kumar, Rm. P. Nachiappan, Rajan Vatsa (1995), A new technique for the calibration of neutron moisture probe, Proc. Intl. Conf. Hydrol. Water Resour., Dec.20-22, 1993, New Delhi, Water Resour. Plng. & Mgmt. Vol 4., Kluwer Academic, Dordrecht, The Netherlands.

Dwivedi, A. K., C. K. Jain & Bhishm Kumar (1991), Soil moisture measurement techniques, Jalvigyan Sameeksha, Vol. V(1&2).

Kiran Shankar, Bhishm Kumar and B.P. Singh (1979), Determination and analysis of the variation of soil moisture at various depths by Ra-Be Neutron Scattering Probe, proceedings of the Indian Science Academy 45(Part-A):476-484.

Nigam, D.D., R. C. Saxena and Bhishm Kumar (1980), Displacement of soil water by simulated rainfall by Gamma-Ray Transmission Method, and Ra-Be neutron Probe, Nuclear Techniques in Hydrology, N.G.R.I., Hyderabad, India. pp. 189-197.

Saksena, R. S., Satish Chandra and B.P. Singh (1974). A Gamma ray transmission method for the determination of moisture contents in soils J. of Hydrology 23 (1974), 341-352.

Singh, B. P. and Bhishm Kumar (1983), Assessment of ground water recharge due to rainfall and irrigation by Gamma-Ray Transmission Method, International Conference on Ground Water and Man, Sydney.

Singh, B. P. and Bhishm Kumar (1988), Gamma-ray transmission method for the study of soil-water characteristics, Indian Journal of Pure and Applied Physics, Vol.26, May 1988.

Singh, B. P., and Bhisim Kumar (1990), Movement of the water pulse in soil column by gamma ray transmission method, Indian Journal of Pure and Applied Physics, 28:293-298.

Singh, B. P. and Satish Chandra (1977). Evaluation of the optimum thickness of soil between source and detector in gamma ray transmission method. J. of Hydrology, Vol.32. 189-191.
