\_\_\_\_\_

\_\_\_\_\_

**Name of Local Newspaper:** \_\_\_\_\_

**Editor e-mail address:** \_\_\_\_\_

**This nomination submitted by:**

**Name:** \_\_\_\_\_

**E-mail Address:** \_\_\_\_\_

**Phone number:** \_\_\_\_\_

**Florida Biomedical Society Chapter and City:** \_\_\_\_\_

**Example biography has been provided.**

*EXAMPLE: (Name) graduated from Foley High School in Foley, Alabama in 1983. She graduated with an A.S. Degree in Electronics Technology from Pensacola Junior College in Pensacola, Florida. (name) first Biomedical Equipment Technician job was at Baptist Hospital in Pensacola. She worked as a BMET at Baptist Hospital for over 3 years. (name) worked for a short period as a Customer Engineer in North Carolina with a company which was at that time called Hewlett Packard. (name) later went to work as a BMET at the University of North Carolina Hospital in Chapel Hill, North Carolina. For the next three years she remained there and gained a solid base knowledge of patient monitoring systems and defibrillators. In 1993 (name) accepted a position at a Dialysis Clinic in Raleigh, North Carolina where she supervised equipment technicians and managed the facility's support operations. After there, (name) accepted a position as Senior Biomedical Equipment Technician at Duke University Medical Center in Durham, North Carolina, where she worked for over six years. (name) received her certification as a CBET in 1995. While at Duke, she received manufacturer's training on various equipment and further broadened and strengthened her knowledge base and experience, adding to the list of equipment she has experience repairing and maintaining to include intra-aortic balloon pumps, ventilators, dialysis machines, and various Intensive Care Unit equipment. In 2004 (name) began working as a CBET at Vanderbilt University Medical Center. In November of 2006 (name) finally had her dream come true when Great Man offered her a job as a SR. BMET at Sacred Heart Hospital in Pensacola, Florida. She returned to the hospital that first employed her full time in 1985 as an Emergency room clerk. (name) is most content at her current job at Sacred Heart Hospital for many reasons. She is living close to her family and is working for a great hospital. Not only is Sacred Heart Hospital an Ascension Hospital, but the Clinical Engineering Department there is managed by (Company) which is also part of the Ascension Organization. This means a great deal to (name) because of her faith.*

*In closing, (name) would like to voice how she feels very blessed to not only be employed by Sacred Heart Hospital under (Company) management, but just as much, to have a manager who in (name) words: "... is very involved in his department and the support it provides. He supports and cares about his associates and promotes teamwork. He is always available to help his staff and is very pleasant to work for. "*
