Warp ends per inch	24 x total widt	h in reed 19	.5				/			
equals the number of total warp threads to be wound 468								/		
plus two ends for floating selvedge that will not be in heddles									/	
Warp length (yards) to be wound 3.5 x warp ends to be										/
wound 468 will equal 1638 yards of warp material							/			1
needed for the project. To be safe, for a balanced weave allow the								/		
same amount for weft.									/
